Education

Bachelor of Technology in Computer Science and Engineering 2022 – 2026
Noida Institute of Engineering and Technology, Greater Noida
Specialization: Internet of Things

Technical Skills

Languages: Java, Python, JavaScript
Web Technologies: HTML, CSS, REST APIs
Databases: MySQL, Oracle DB
Tools & Platforms: Git, GitHub, Docker, Kubernetes, Linux (Raspberry Pi)
Core Concepts: Data Structures & Algorithms, OOP, Edge Computing, Resource Optimization

Projects

Doordarshi – Offline AI-Based Visual Assistant GitHub Link
Python, Raspberry Pi

- Developed a fully offline AI-based assistive system delivering real-time scene descriptions in under 8 seconds using lightweight models.
- Integrated Tesseract OCR with image preprocessing techniques, achieving approximately 80% text recognition accuracy.
- Designed a 3-mode hardware interface with optimized processing and power efficiency for portability.

Rainfall Analysis & Prediction GitHub Link
Python, Pandas, Scikit-learn

- Built regression and classification models to predict rainfall occurrence using weather parameters.
- Performed data cleaning and exploratory data analysis to enhance prediction reliability.
- Built and evaluated Linear and Logistic Regression models for quantitative and binary rainfall prediction.

Responsive Web Application Development GitHub Link
HTML, CSS, JavaScript

- Developed responsive web applications ensuring cross-browser compatibility and consistent UI experience.
- Implemented dynamic DOM manipulation for real-time user interaction.
- Managed version control workflows using Git and GitHub.

Leadership

- Led a 4-member team to design and deploy an Event Management Web Application.
- Collaborated in a 3-member team to develop a Disaster Management Rover prototype for a technical competition.
