Professional Summary

Computer Science undergraduate with strong knowledge of software development, data science, and machine learning. Experienced in building web applications, developing AI tools, and analyzing data using Python. Skilled in Data Structures, Algorithms, Python, Web Development, and Cybersecurity concepts. Seeking opportunities in Software Development, AI/ML, or Data Science.

Education

Noida Institute of Engineering & Technology, Greater Noida
Bachelor of Technology (B.Tech) in Computer Science
CGPA: 7.5/10

Class XII (Senior Secondary)
Percentage: 74%

Class X (Secondary)
Percentage: 91%

Technical Skills

- **Programming:** C, C++, Python, JavaScript, HTML, CSS
- **Data Science:** NumPy, Pandas, Jupyter Notebook
- **Computer Science:** Data Structures, Algorithms, Object-Oriented Programming
- **Tools:** Git, GitHub, VS Code, Anaconda, MongoDB, Vercel
- **Databases:** MySQL, MongoDB
- **Cloud:** AWS (Basic)

Projects

Network Intrusion Detection System

- Developed a machine learning-based intrusion detection system to detect malicious network activity.
- Analyzed network traffic data to identify cyber threats and unauthorized access.
- Implemented real-time alert generation for system administrators.

Remote Server Monitoring System

- Built a system to monitor server performance remotely.
- Tracks CPU usage, memory utilization, and system uptime.
- Generates alerts for abnormal system behavior.

Jarvis AI Chatbot

- Developed an AI chatbot integrated with Google Gemini API.
- Implemented chat history and intelligent conversational responses.
- Designed responsive UI using HTML, CSS, and JavaScript.

Deepfake Detection System

- Built a system to identify AI-generated fake media (images, videos, audio).
- Analyzes inconsistencies like facial expressions, voice, and lighting.
- Utilized machine learning/deep learning models (CNNs) for detection.
