Professional Summary

Final-year B.Tech Computer Science student with hands-on experience in building and analyzing data-driven and web-based applications. Strong foundation in Python, Java, SQL, problem analysis, and structured software workflows, with experience in debugging, working with datasets, and collaborating in team-based environments. Familiar with cloud fundamentals, databases, and modern development practices, and quick to learn new tools.

Skills and Interests

Programming Languages	Java, Python, PHP, JavaScript, SQL
Databases	MySQL, PostgreSQL, MongoDB
Frameworks & Libraries:	React.js, Node.js, Express.js
Testing & Dev Practices	SDLC, Unit Testing (basic), Version Control (Git)
Cloud Exposure	AWS/Azure (basic concepts), Docker (fundamentals)

Education

Noida Institute of Engineering and Technology — *Nov 2022 - June 2026*
Bachelor of Technology in Computer Science and Engineering (IoT) — **CGPA**- 7.01/10.0

Experience

LLM Post Training Intern | Ethara AI

- Contributed to post-training workflows for Large Language Models (LLMs), supporting end-to-end data lifecycle management.
- Curated, cleaned, and annotated large conversational and instructional datasets to improve data quality and consistency.
- Assisted in model evaluation and response quality analysis, focusing on accuracy, coherence, and alignment.
- Supported training and refinement of LLM based models using curated datasets.
- Collaborated with cross-functional teams and gained exposure to ML pipelines, feedback loops, and post-training optimization.
- Gained exposure to iterative ML workflows, dataset versioning, and continuous model refinement cycles.

Projects

URL Shortener App| *React.js, Node.js, Express.js, MongoDB*

Link

- Built a full-stack URL shortener using React.js, enabling fast conversion of long URLs into short, shareable links with seamless redirection.
- Designed a responsive and intuitive UI using React.js and Tailwind CSS, improving usability across devices.
- Developed scalable REST APIs with Node.js and Express for efficient URL generation and routing.
- Integrated MongoDB for persistent storage and implemented visit tracking for basic analytics.

Student Task Manager Web Application | *PHP, MySQL, HTML5, Tailwind CSS, Bootstrap, JavaScript*

Link

- Designed and developed a responsive task management system using PHP, MySQL, Tailwind CSS, JavaScript and XAMPP, enabling students to efficiently create, update, and track tasks.
- Implemented secure session handling and dynamic MySQL queries with error handling, ensuring reliable data operations and user authentication.
- Integrated task prioritization and due date management, enhancing task organization and productivity.
- Optimized for mobile responsiveness with Tailwind CSS, achieving seamless usability across devices.

Certifications

- **Java Programming Fundamentals** – Infosys Springboard, 2025
- **ReactJS** – Infosys Springboard, 2024
- **Python for Data Science, AI and Development** – Coursera, 2023
- **Python Basics** – Coursera, 2023

Academic Achievements & Activities

- **Event Volunteer, NIET (2024)** – Coordinated and executed large-scale technical and cultural events (200+ participants) by leveraging teamwork, planning, and communication skills.
- Selected and participated in Smart India Hackathon (SIH) 2024, contributing to innovative solution development.
