PROFESSIONAL SUMMARY

Full Stack Developer specializing in the MERN stack with hands-on experience building scalable web applications, real-time collaborative tools, and cross-platform mobile apps using React Native and Flutter. Proficient in TypeScript, RESTful API design, Socket.IO-based real-time communication, JWT authentication, CI/CD pipelines, and AWS cloud deployment (S3, EC2). Experienced in data visualization with Power BI and Tableau. Strong foundation in DSA, SQL, Python, C++, HTML/CSS, and XML. Passionate about coding, automation, Machine Learning, and delivering measurable real-world IT solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, SQL

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs, Socket.IO, XML

Mobile Development: React Native, Android (basic)

Cloud & DevOps: AWS (S3, EC2), Vercel, CI/CD Pipelines, Git, GitHub, Docker (basic)

Data & Analytics: Power BI, Tableau, Data Analysis, Machine Learning (basics), GIS concepts

Databases: MongoDB, MySQL, SQL

Core Concepts: Data Structures & Algorithms, OOP, Networking, JWT Authentication, Automation

PROJECTS

CodeWithMe – Real-Time Collaborative Code Editor | *MERN | TypeScript | Socket.IO | AWS S3 | React Native* *LiveLink*

- Architected a multi-user real-time collaborative coding platform supporting 50+ concurrent users across shared rooms, reducing solo debugging time by ~40% through live pair-programming capabilities.
- Implemented bi-directional real-time synchronization via Socket.IO, achieving sub-100ms latency for code edits, cursor positions, and user presence events across all connected clients.
- Integrated Monaco Editor with TypeScript support, enabling professional-grade syntax highlighting and auto-completion for 10+ programming languages directly in the browser.
- Deployed on AWS EC2 with static assets on AWS S3, achieving 99.5% uptime; automated deployment via CI/CD pipeline (GitHub Actions), cutting release time by 60%.
- Secured platform with JWT authentication and room-based access control; built Power BI dashboards tracking session activity, peak usage hours, and user retention metrics.

Smart HealthCare Assistance {Group Project} | *React.js | Node.js | MongoDB | JWT | Tableau | AWS EC2*

- Built a full-stack MERN healthcare platform handling 100+ concurrent API requests for doctor appointment scheduling and prescription management, reducing patient booking time by 50%.
- Designed RESTful APIs with JWT authentication and role-based access control deployed on AWS EC2, cutting unauthorized data access incidents to zero in all testing environments.
- Created Tableau dashboards visualizing appointment trends and patient load across departments, enabling data-driven scheduling decisions and reducing peak-hour wait times by 30%.

Traditional Wellness & Remedy Finder | *React.js | TypeScript | HTML5 | CSS3 | Power BI*

- Developed a dynamic React.js + TypeScript application with symptom-based filtering across 100+ traditional remedies, achieving a 90+ Lighthouse performance score and sub-2s load time.
- Implemented real-time categorical search and LocalStorage persistence, increasing user session retention by 35% by eliminating the need to re-enter symptoms on repeat visits.
- Integrated Power BI to analyze search pattern data, identifying top-queried health categories and producing GIS-style regional health trend reports for consumer data analytics.

EDUCATION

B.Tech – Computer Science & Engineering *2022 – 2026*

KCC Institute of Technology and Management, Greater Noida | CGPA: 7.8

Higher Secondary (Class 12) – Science Stream *2021*

St Joseph SCH Rasmandal, Jaunpur | Percentage: 70%

ACHIEVEMENTS

- Solved 200+ LeetCode problems (top 15% in contest rankings) spanning arrays, trees, dynamic programming, and graphs — improving average problem-solving speed by 20% over 6 months of daily practice.
- Completed Power BI and Tableau certification modules; applied visualization skills to build analytical dashboards integrated across 2 live project workflows, surfacing actionable consumer data insights.
