SUMMARY

Skilled web developer with a strong computer science background. Expert in HTML , CSS and Java Script , with proficiency in PHP and committed to staying updated on industry trends. Strong analytical skills to identify issues and develop efficient solutions.

TECHNICAL SKILLS

- **Programming languages:**
  C, C++, Java
- **Web Technologies:**
- **Frontend:**
  HTML5, CSS, JavaScript, CSS, Bootstrap
- **Backend:**
  React JS, NodeJS, SQL
- **Version Control System:**
  GitHub

CERTIFICATIONS

- Front-End Web Development
  Coursera May'23
- Front-End Web Development
  Gokboru Tech Pvt. Ltd
  June'27

EXTRA CURRICULAR ACTIVITIES

- Building web apps using Front-end
  Backend Technology
- solve puzzle problem
- Coding and Solve LeetCode problems

PROJECTS

- **A small restaurant program by use Java language.** **Feb'22 2024**
- **Aim :-** The program streamlined various restaurant operations, including order taking, menu management, and billing. It was designed to improve efficiency and enhance customer service
- **Tech :-**
  Java Runtime Environment (JRE): Used for running the application on various systems. Used for core application development.
- **Learning Outcomes :-** Enhanced understanding and proficiency in Java programming, including object-oriented principles. Improved problem-solving skills by addressing real-world challenges in restaurant management.
- **Study-Hub Website (Frontend)** **April 23 2024**
- **Aim :-** The aim was to create a high-quality, visually appealing, user-friendly, and responsive website that met the needs of the target audience while utilizing the latest front-end technologies and best practices.
- **Domain :-** The technologies that were used in creating the front-end website included HTML5, Bootstrap 5, and CSS.
- **Learning Outcomes :-** Creating a front-end website using these technologies provided a solid foundation in web development, design principles, and best practices for building modern, user-friendly websites.
- **Soil Monitoring System** **March 22 2024**
- **Aim :-** The aim of the soil monitoring system in IoT was to enable real-time monitoring of soil conditions like moisture levels, temperature, and pH, providing farmers with data to optimize irrigation, fertilizer application, and crop health management.
- **Tech :-** The technologies used in the soil monitoring system in IoT included sensors for data collection and transmission, microcontrollers for processing, and connectivity protocols for remote access and control.
- **Learning Outcomes :-** The learning outcomes from developing the soil monitoring system in IoT included gaining expertise in sensor integration and data processing with microcontrollers.

ACHIEVEMENTS

- **Secured Global Rank 3783rd:** **12 may 2024**

  Among 21k+ participants in Leetcode Biweekly Contest 96

EDUCATION

Bachelor of Computer Applications 2023 - Present

Lovely Professional University

Phagwara, IN

CGPA 8.2

Higher Secondary Jun2018 - March 2020

Lord Buddha Public School

Aurangabad, Bihar

CGPA 7.5

Matriculation March 2018

Lord Buddha Public School

Aurangabad ,Bihar.

CGPA 6.5
