Summary

Java Developer with strong expertise in Core Java, OOP, and backend development. Experience in building applications using MongoDB Atlas for scalable data solutions. Knowledge of Spring Boot and REST APIs. Skilled in writing efficient code and solving problems using data structures and algorithms. Seeking a Software Developer role to build scalable and impactful applications.

Experience

Cloud Analogy, Noida **Jul 2025 – Oct 2025**
Salesforce Developer Trainee *(4 months)*

- Engineered over 100 Apex classes and triggers to manage backend business logic and ensure data validation.
- Streamlined workflows using Record-Triggered Flows and validation rules.
- Supported debugging, testing, and deployment within a structured development lifecycle.

Projects

Food Donation System (Java + MongoDB Atlas)

- Enhanced a food donation management system using Core Java and Java Swing for user interaction and system operations.
- Utilized Object-Oriented Programming principles by designing Donor and Recipient classes with proper encapsulation and modular structure.
- Integrated MongoDB Atlas for cloud-based data storage, replacing in-memory structures with persistent and scalable storage.
- Executed CRUD operations improving data handling efficiency for donors, recipients, and food items with database integration.
- Improved matching logic between donors and recipients for efficient request handling and donation tracking.
- Employed regular expressions to validate user inputs such as mobile numbers.
- Expanded the database helper layer to manage MongoDB connections, queries, and data persistence using the Java MongoDB driver.
- Built an interactive GUI using Java Swing components such as JFrame, JButton, and event-driven mechanisms.

User Management API (Spring Boot)

- Built REST APIs using Spring Boot for user management (CRUD operations).
- Utilized a layered architecture (Controller, Service, Repository) for better code organization.
- Integrated MongoDB to handle database operations efficiently.
- Performed API testing using Postman.

Certifications

- **Java Concepts (Infosys Springboard)**
- **Problem Solving (HackerRank)**

Education

Noida Institute of Engineering & Technology (NIET), Greater Noida **Jul 2024 – Present**
Master of Computer Applications (MCA) *CGPA: 8.43*

Anugrah Narayan College, Patna **2021 – 2024**
Bachelor of Computer Applications (BCA) *Percentage: 67%*

Skills

- **Programming: Java, SQL, Apex**
- **Frameworks: Spring Boot, Spring MVC**
- **Databases: MySQL, MongoDB Atlas**
- **Web: HTML, CSS, JavaScript**
- **Tools: VS Code, IntelliJ IDEA, Git, GitHub, Data Loader**
- **Concepts: OOP, REST APIs, API Development, Data Structures and Algorithms**

Training / Achievements

Salesforce Admin & Developer Training – LearNowX (NIET)

Solved 250+ problems in data structures and algorithms across LeetCode, GeeksforGeeks, and HackerRank.
