PERSONAL PROJECTS

–The Gold – The Future Of India

The GOLD – Sports Talent Discovery Platform is an initiative aimed at addressing these challenges by providing a centralized digital solution for athlete registration, performance evaluation, trial management, and talent development. This project focuses on designing and developing a secure, scalable, and user-friendly platform that empowers athletes to showcase their skills digitally and enables coaches and organizations to identify promising talent efficiently

(front-end)

∗ Tools technologies used : HTML - structure of web pages, CSS – styling and designing, JavaScript – buttons, forms animations, React.js – JavaScript library for building web apps

(back-end)

∗ Node.js – popular for startups, easy to connect with react, uses JavaScript everywhere
∗ Python – easy to code, great for AI or analytics
∗ Java(spring boot) – very strong to secure
∗ PHP – simple for traditional web development

Conclution

∗ Talent is everywhere. Opportunity is not. The God is here to challenge that.

TECHNICAL SKILLS anD INTERESTS

Languages: C/C++, Python, SQL, HTML, Javascript
Developer Tools: VScode, GitHub,Git,Postman, Google Colab, Jupyter Notebook
Frameworks: NodeJs, ExpressJs, Bootstrap CSS
