Summary

Java Developer (Fresher) with strong knowledge of Core Java, OOP concepts, SQL, and DBMS. Hands-on experience in academic projects like Food Donation System and Banking Management System. Good problem-solving skills and understanding of data structures. Looking for an entry-level opportunity to utilize my technical skills and gain practical industry experience.

Experience

Cloud Analogy, Noida **July 2025 – Oct 2025**
Salesforce Administrator Trainee *(4 Months)*

- Managed Salesforce configurations, custom objects, flows, validation rules, and user access.
- Automated processes using record-triggered flows to improve efficiency and data accuracy.
- Assisted in testing, deployment, and system maintenance following best practices.

Projects

Food Donation Management System

- Developed a desktop application using **Core Java and Java Swing** to streamline the process of food donation between donors and needy recipients.
- Implemented **object-oriented programming concepts** such as encapsulation and modular class structure for entities like Donor and Recipient.
- Designed a **user-friendly graphical interface** using Swing components such as JFrame, JButton, JLabel, and JOptionPane with event-driven programming (ActionListener).
- Built core functionalities including **donation management, food request processing, matching donors with recipients, and feedback tracking**.
- Focused on improving code structure, usability, and maintainability through proper documentation and logical design.

Banking Management System (Salesforce)

- Developed a **Banking Management System** on the Salesforce platform using custom objects, workflows, and validation rules.
- Implemented role-based security and validation for safe transactions.
- Automated banking processes like balance check, transaction limits, and EMI calculations.

Certifications

- **Java Concepts (Infosys Springboard)**
- **Python Essentials I and II (Cisco Networking Academy)**

Education

Noida Institute of Engineering & Technology (NIET), Greater Noida **July 2024 – Present**
Master of Computer Applications (MCA) *CGPA: 7.57/10*

Anugrah Narayan College, Patna **2021 – 2024**
Bachelor of Computer Applications (BCA) *Percentage: 65%*

Skills

- **Programming: Java, Python**
- **Database: MySQL**
- **Web: HTML, CSS, JavaScript**
- **Software Testing: Manual Testing, Test Case Design, Bug Lifecycle (Defect Lifecycle)**
- **Tools: VS Code, IDLE**
- **Concepts: OOP, SDLC, STLC, Governor Limits**

Training / Achievements

Salesforce Admin & Developer Training – LearNowX (NIET, Greater Noida)
