OBJECTIVE

MCA student with hands-on experience building desktop applications using Java, Swing, and MySQL. Skilled in OOP principles, JDBC connectivity, relational database design, and end-to-end application development. Seeking a Java developer or software engineer role where I can contribute to real-world products and grow within a collaborative engineering team.

TECHNICAL SKILLS

Languages: Java, SQL, HTML, CSS

Frameworks & Tools: Java Swing, JDBC, MySQL, Git, GitHub, VS Code

Concepts: OOP (Encapsulation, Inheritance, Abstraction, Polymorphism), CRUD Operations

PROJECTS

Tour & Travel Management System

Tech Stack: Java, Java Swing, JDBC, MySQL

- Developed a desktop-based Tour & Travel Management System using Java Swing for the GUI and MySQL for backend data storage and retrieval.
- Designed a relational database schema to manage tours, bookings, customers, and travel packages efficiently across multiple tables.
- Built interactive UI forms using Java Swing components (JFrame, JTable, JButton, JComboBox) for booking, search, and management operations.
- Implemented JDBC connectivity to establish seamless communication between the Java frontend and MySQL database for real-time CRUD operations.
- Created modules for customer registration, tour package selection, booking management, and billing to cover end-to-end travel workflow.
- Applied OOP principles (Encapsulation, Inheritance, Abstraction) to structure the codebase into reusable and maintainable modules.
