Professional Summary

Final-year MCA student (2026 batch) at NIET, Greater Noida, with a strong foundation in Java, Python, and JavaScript. Experienced in developing full-stack applications using React.js, REST APIs, JDBC, and Servlets. Consistent DSA practitioner on GeeksforGeeks with solid command over Data Structures, Algorithms, and OOP principles. Seeking a Software Developer role to apply backend and frontend expertise in building scalable, production-ready systems.

Education

Noida Institute of Engineering & Technology — Greater Noida, UP
Master of Computer Applications (MCA) — *2024 – 2026*
- CGPA: 7.3/10 (73%)

Jawahar Lal Nehru College — Rohtas, Bihar
Bachelor of Computer Applications (BCA)
Percentage: 68.44%

Technical Skills

Languages: Java, Python, JavaScript, SQL

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js

Backend: JDBC, Servlets, REST APIs

Core CS: Data Structures & Algorithms, OOPs, DBMS, API Design

Tools & Platforms: Git, GitHub, Linux, VS Code

Projects

Library Management System — *Java · MySQL · JDBC · Swing*
- Built a desktop application to manage books, users, and issue/return records with role-based access.
- Implemented complete CRUD operations using JDBC with a normalized MySQL relational database.
- Optimized query execution and data handling, reducing record retrieval time by improving indexing.

ZenBot — Mental Health Chatbot — *HTML5 · CSS3 · JavaScript*
- Developed a responsive, browser-based chatbot interface focused on mental health support interactions.
- Implemented keyword-based input handling and dynamic response rendering using vanilla JavaScript.
- Designed accessible UI with clean layout, high contrast, and mobile-responsive structure.

Personal Portfolio Website — *HTML5 · CSS3 · JavaScript*
- Designed and deployed a fully responsive portfolio site to showcase projects, skills, and achievements.
- Implemented smooth scroll navigation, section animations, and interactive UI components using JavaScript.
- Structured semantic HTML for better accessibility and search engine discoverability.

Certifications

Python & Java Foundation — Infosys Springboard — *2025*

DevOps Training: Linux, Git, Docker & AWS — — *2026*

Achievements & Extracurriculars

Active problem solver on **GeeksforGeeks** with consistent Data Structures & Algorithms practice.

Completed multiple end-to-end projects spanning full-stack development and system design concepts.

Strong debugging and code-review skills developed through iterative project development.
