Professional Summary

Results-driven MCA student with a strong foundation in Core Java, JDBC, Servlets, React.js, JavaScript, HTML, CSS, and MySQL. Experienced in designing and developing full-stack web applications through academic projects, self-initiated development, and hands-on internship experience. Adept at writing clean, maintainable code and collaborating effectively in team environments. Seeking an entry-level Java developer role to apply technical expertise and contribute meaningfully to real-world product development.

Technical Skills

- **Languages:** Java, JavaScript, HTML, CSS, SQL
- **Frameworks:** React.js, Tailwind CSS, Redux
- **Backend:** Servlets, JSP, JDBC
- **Database:** MySQL
- **Tools & Build:** Git, GitHub, VS Code, Maven

Education

Master of Computer Applications 2025 – Present(Expected: 2027)
Noida Institute of Engineering & Technology, Greater Noida | CGPA: 8.04(Semester 1)

Bachelor of Computer Applications
Bengal College of Engineering & Technology, Durgapur | CGPA: 7.91 2022 – 2025

Internships

Web Developer Intern - Ardent Computer Pvt. Ltd. Hybrid | Durgapur, West Bengal | July 2024 - Aug 2024

- Developed and maintained a Management System using Java Servlets, JSP, and JDBC for server-side logic and database operations
- Designed and implemented RESTful API endpoints to handle client-server communication efficiently
- Optimized backend queries and application flow, contributing to a 25% improvement in page load time
- Collaborated with the development team in an Agile environment to deliver features on schedule

Projects

One Destination E-Commerce Website React | Redux | Tailwind CSS

- Developed a responsive and dynamic e-commerce web app for travel-related products
- Implemented state management using **Redux** for cart, product filtering, and user login
- Added features like product search, cart page, checkout flow, and user authentication

Hospital Management System Java | Servlets | JSP | Maven | MySQL

- Developed a web-based hospital management system to manage patient records, doctor appointments, and billing information
- Implemented MVC architecture using Java Servlets and JSP for clean separation of business logic and presentation layer
- Used Maven for project dependency management and build automation
- Stored and retrieved data efficiently using MySQL with JDBC connectivity
