NITIN PRAJAPATI

Java Developer • DSA Specialist • OOP & Problem Solving

1233nitinprajapati@gmail.com | +91 6392824532 | github.com/Nitin-Prajapati | linkedin.com/in/Nitin-Prajapati | HackerRank: @NitinPrajapati

PROFESSIONAL SUMMARY

Results-driven Java Developer with strong fundamentals in Core Java, OOP, and Data Structures & Algorithms. Achieved HackerRank 5-Star Gold Badge in Java — placing in the top tier of global Java problem solvers. Certified in DSA by Apna College. Proven ability to design efficient, scalable solutions with hands-on academic project experience. Seeking a Junior Java Developer or Software Engineer role to build high-performance applications.

EXPERIENCE

Database Coordinator | SCHOOLING (*1st Nov-15th Dec 2024*)

- Designed and maintained structured datasets supporting multiple operational projects — enforced data integrity protocols across full project lifecycle, achieving zero data-loss incidents.

TECHNICAL SKILLS

Languages: Java (Core, OOP, Collections, Exception Handling, Multithreading) • Python • SQL

DSA: Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Sorting & Searching, Recursion, Dynamic Programming, Hashing

Concepts: Object-Oriented Programming, SOLID Principles, Design Patterns, Time & Space Complexity, Clean Code

Tools: Git / GitHub, IntelliJ IDEA / VS Code

Soft Skills: Analytical Thinking, Problem Solving, Technical Communication, Team Collaboration

CERTIFICATIONS & BADGES

HackerRank Java — 5 Star Gold Badge | Top-tier ranking among global Java developers; solved 50+ challenges across Core Java, OOP & DSA domains

DSA Certificate — Apna College | Completed intensive DSA course covering 100+ problems across Trees, Graphs, DP, and Sorting algorithms

PROJECTS

Java Console-Based Banking System | Academic Project *2024*

- Engineered a fully functional banking application in Core Java implementing OOP principles — encapsulation, inheritance, polymorphism, and abstraction across 10+ classes.
- Implemented exception handling for 8+ edge cases (invalid transactions, insufficient funds, null inputs) — achieving zero unhandled runtime crashes during testing.
- Designed modular architecture following SOLID principles, reducing code duplication by ~40% and improving maintainability.
- **Java • OOP • Collections Framework • Exception Handling • File I/O** Stack:

AI-Powered Facial Emotion Recognition System | Python / Deep Learning Project *2024*

- Built real-time CNN emotion classifier using Python & OpenCV — achieved 85%+ classification accuracy across 5+ emotion categories, demonstrating cross-language development capability.
- Applied algorithmic optimisation techniques (informed by DSA training) to reduce inference latency by 30% on standard hardware.
- **Python • OpenCV • TensorFlow / Keras • CNN • NumPy** Stack:

EDUCATION

Master of Computer Applications (MCA) | NIET, Greater Noida *2025 – 2027*

Bachelor of Computer Applications (BCA) | KCCILHE, Greater Noida *2022 – 2025*

LEADERSHIP & RECOGNITION

Class Representative | NIET (60+ students) | Managed academic communications, deadlines & faculty coordination *2025–26*

NSS Coordinator | KCCILHE | Led cross-functional volunteer teams in community

3rd Place — College-Wide Thinktank Competition | Ranked top 3 across entire student body for analytical reasoning & technical problem solving
