RAJAT RAJ

rajatraj5074@gmail.com +91 6207225074 Pari Chowk, Greater Noida, UP

Objective: Third-year B.Tech (CSE – Cyber Security) student with hands-on experience in security tools and a strong foundation in DSA and networking. Seeking to contribute to secure application development and threat analysis in a practical environment.

Education

B.Tech CSE (Cyber Security) 7.94 CGPA

Noida Institute of Engineering & Technology, Greater Noida, UP 2023-Present

Bihar School Examination Board (Class XII) 64.06 %

Sri Ram Naresh Choudhary High School CBSE | 2023

Professional Experience

Cybersecurity Intern, Infotact Solutions Apr 2025 – Jul 2025

- Built a virtual lab environment with Kali Linux and **vulnerable web applications** for security testing.
- Performed VAPT assessments using Nmap, OpenVAS, and Burp Suite (OWASP Top 10).
- Documented and prioritized vulnerabilities using CVSS scoring with mitigation strategies.

Projects

Vulnerability Assessment & Web Penetration Testing | Tech Stack: Kali Linux, Nmap, OpenVAS, Burp Suite

- Developed a virtual lab using Kali Linux and vulnerable web applications to simulate real-world attack scenarios.
- Conducted VAPT to identify OWASP Top 10 vulnerabilities and documented findings using CVSS scoring with mitigation strategies.

VIGIL AI | Cyber Fraud Detection System | Tech Stack: Python, FastAPI, Transformers (BERT, BART)

- Built an AI-driven system to detect and classify cyber scams (OTP, phishing, impersonation) using transformer models
- Integrated VirusTotal and IPQualityScore for real-time URL and IP threat analysis
- Developed a responsive web interface for instant scam scoring and fraud type detection across multiple inputs

Technical Skills

- **Programming Languages:** Python, Java, SQL
- **AI/ML:** NLP, Transformer Models (BERT, BART), Supervised Learning
- **Web Development:** HTML, CSS, JavaScript, FastAPI
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Cybersecurity:** OWASP Top 10, Vulnerability Assessment, Network Analysis
- **Security Tools:** Wireshark, Nmap, Burp Suite, OWASP ZAP, Autopsy
- **Platforms & Tools:** Kali Linux, Git, GitHub, Bash Scripting, Traceroute
- **Databases:** MySQL, MongoDB

Certifications

- **Cybersecurity Essentials** | Cisco Networking Academy | April 2026
- **Cyber Security and Hacker Tactics Awareness Training** | Infosys Wingspan | March 2025

Leadership & Technical Involvement

- Led the Cyber Invaders Group as Technical & Management Lead, overseeing end-to-end cybersecurity project execution, streamlining team coordination, and ensuring timely, high-quality deliverables
- Organized hands-on cybersecurity events including hashing challenges and Capture The Flag (CTF) competitions, enhancing practical skills in real-world attack and defense scenarios
