PROFILE SUMMARY

Entry-level **AWS Cloud Engineer** with a strong foundation in **Linux server** management, **cloud security**, and **automation**. Skilled in deploying and managing AWS services, **infrastructure** provisioning using **Ansible**, and automating workflows with **shell scripting** for efficient cloud operations.

TECHNICAL SKILLS

- **Knowledge :** Cloud Computing, DevOps Practices, Linux Administration, Networking Basics
- **Languages :** Python, C++
- **Scripting :** Shell Scripting
- **Automation :** Ansible
- **Versioning :** Git, GitHub
- **Cloud & Virtualization:** AWS (EC2, VPC, IAM, S3, Load Balancer), Docker
- **Monitoring & Backup:** CloudWatch, Custom Bash Scripts, Log Rotation & Backup
- **Tools & OS :** Linux (Ubuntu, RHEL), Git, Ansible, Docker, AWS CLI

PROJECTS

System Monitoring and Alerting Automation Tool (GitHub)

Tech Stack: Bash, Ansible, Linux (Ubuntu)

- Developed a **Bash-based monitoring script** to track CPU, memory, disk usage, processes, services, and network activity across Linux servers.
- Integrated with **Ansible playbooks** for automated deployment and configuration on multiple servers.
- Implemented **alerting via Gmail and Telegram** for proactive issue detection (e.g., high resource usage, failed services, suspicious activity).
- Added **automatic log file backup** for auditing and troubleshooting, improving system reliability and maintainability.

AWS Three-Tier Web Architecture Deployment (GitHub)

Tech Stack: Amazon Web Services (EC2, VPC, RDS Aurora MySQL, S3, IAM, ELB), Nginx, React.js, Node.js

- Deployed a scalable **three-tier architecture** on **AWS** with **separate web, app**, and **database layers**.
- Configured **VPC**, **load balancers**, and **security groups** for secure and efficient traffic flow.
- Implemented **Auto Scaling** and **CloudWatch monitoring** to ensure **high availability** and performance.
- Integrated **S3** and **CloudFront** for optimized static content delivery and reduced latency.
- Automated deployment using **EC2** User Data scripts and **AWS CLI**, reducing manual configuration and improving consistency.

EDUCATION

Degree	Institute/ School	Period
BCA (Cloud Computing)	Invertis University	2022-2025
CBSE – XII	S.J.S Public School	2021-2022
CBSE – X	S.J.S Public School	2019-2020
