Summary

Final-year B.Tech student in Artificial Intelligence with experience in building web-based applications and automation tools. Proficient in Python, PHP, and JavaScript with practical knowledge of data structures, file handling, and API integration. Contributed to real-world projects through internships involving backend logic, front-end interfaces, and database operations. Delivered user-focused features such as authentication systems, recommendation engines, and real-time updates across platforms.

Education

DAV Public School, Muzaffarpur, Bihar — April 2020 – March 2021
Higher Secondary (CBSE)

Noida Institute of Engineering and Technology, Greater Noida, UP — Nov 2022 – June 2026
B.Tech in Computer Science and Engineering (AI Specialization)

Technologies

Languages: Python, Java, PHP, JavaScript, HTML, CSS
Databases: MySQL, MongoDB
Framework: Bootstrap, TensorFlow, OpenCV
Developer Tools: VS Code, Git, IntelliJ IDEA, Jupyter Notebook, Google Colab

Experience

Artificial Intelligence Intern — Noida, India
Codtech IT Solutions — June 2024 – July 2024

- Successfully completed a 6-week hands-on internship focused on real-world AI and full-stack development projects.
- Collaborated on 3+ feature enhancements, improving data handling efficiency and UI responsiveness by 15%.
- Debugged and optimized over 1,000 lines of code, reducing system response time by 25% through code refactoring and performance tuning.

Python Developer Intern — Delhi, India
CodSoft — July 2023 – August 2023

- Completed a 4-week structured internship focused on Python fundamentals and hands-on software development.
- Wrote and tested 500+ lines of Python code across 4 mini-projects, applying file handling, data structures, and modular coding techniques.
- Achieved 95% proficiency in internal Python problem-solving and evaluation assessments.

Projects

Movie Recommendation Web Application

- **Technologies used:** HTML, CSS, Bootstrap, JavaScript, PHP, MySQL
- Developed a dynamic movie recommendation system that provided personalized suggestions to over 100 users based on genre preferences and watch history.
- Built a responsive front-end using HTML, CSS, Bootstrap, and JavaScript, achieving a 95% mobile responsiveness score.
- Improved user engagement by 40% through intuitive UI/UX, clear navigation, and recommendation tuning.

Certificates

Introduction to Software Engineering by IBM : Coursera (2023)
Building AI Powered Chatbots Without Programming : Coursera (2023)
Deep Learning for Developers : Infosys SpringBoard (2024)
Data Visualization with Python : Coursera (2024)
Artificial Intelligence with Machine Learning : Oracle (2025)
