EDUCATION

ST XAVIERS SALEMPUR
High School (CBSE)--83%
2017-2019

SANSKRITI PUBLIC SCHOOL
Intermediate(CBSE)--71%
2019-2021

UNIVERSITY OF LUCKNOW
BCA--74%
2021-2024

NIET (GREATER NOIDA)
MCA--75% (pursuing)
2024-2026

SKILLS

- Machine learning
- Deep learning
- NLP(RNN,LSTM)
- Transformer
- LLM(GPT,BERT)
- Python
- Django(REST)
- FastAPI
- LangChain
- MongoDB
- My SQL
- DSA (Python)
- Next js(Full Stack)
- Power BI

EXPERTISE

- Full Stack AI App
- RAG Systems
- Model Training
- Communication
- Data Analysis
- Data Mining

ABOUT ME

Results-driven AI/ML Engineer with strong expertise in machine learning, deep learning, and natural language processing. Experienced in building and deploying end-to-end AI solutions, including LLM-based applications, RAG pipelines, and intelligent chatbots. Proficient in Python and modern AI frameworks, with hands-on experience in model development, data processing, and API integration. Skilled at transforming complex data into scalable AI-driven products that solve real-world business problems. Passionate about Generative AI, large language models, and building production-ready intelligent systems.

EXPERIENCE

AI/ML Trainee (Paid Internship) – Medigence(3 Months)
Worked on NLP and Generative AI projects, including RAG-based chatbot development, data processing, and backend API integration using Python.

PROJECTS

- **FACE RECOGNITION ATTENDANCE SYSTEM**

Built a Face Recognition Attendance System using Python and OpenCV for real-time detection and identification.
Automated attendance recording by integrating with a backend database.
Improved accuracy and efficiency over traditional manual systems

- **RAG-BASED COMPANY POLICY ASSISTANT (LLAMA + VECTOR DB)**

Built an LLM-powered system that retrieves and generates answers from internal company documents using embeddings, vector search, and Retrieval-Augmented Generation to reduce hallucinations and improve accuracy.
Tech: Python, LLaMA, LangChain, Vector DB (FAISS/Chroma/Pinecone), FastAPI/Django

- **FRAUD DETECTION MODEL**

Developed a Fraud Detection Model using Random Forest on 6M+ financial transactions.
Engineered features to identify suspicious patterns and handled class imbalance effectively.
Achieved 95% accuracy, ensuring robust and reliable fraud prediction performance.

- **OBJECT DETECTION MODEL**

Built an Object Detection Model using YOLOv8 for real-time identification and localization of objects in images/videos.
Trained on a custom dataset with annotated classes to achieve high precision and speed.
Optimized model performance for deployment in practical applications like surveillance and automation.
