RATAN KUMAR GUPTA

• +91 7903995750 • ratangupta.it@gmail.com • www.linkedin.com/in/ratan07

PROFILE

Aspiring Data Scientist and Software Developer with strong skills in Python, SQL, and data analysis, along with knowledge of machine learning and data visualization. Also experienced in frontend web development (HTML, CSS, JavaScript, React), focused on building efficient and data-driven applications

SKILLS

Data Analysis	MS Excel, MS Word, Power BI ,Statistics
Web Development	HTML/CSS, Basic Java Script
Programming Language and Libraries	Python, C, Java, Matplotlib, Pandas, NumPy

WORK EXPERIENCE

Python (Pie Infocomm) **(June 2024 – August 2024)**

- The internship emphasizes practical aspects of Python programming, allowing interns to work on real-time projects that enhance their coding proficiency.

AI Fundamental (IBM) **(August 2024 – September 2024)**

- Understand fundamental AI topics, including natural language processing, computer vision, machine learning, deep learning, chatbots, and neural networks.

EDUCATION

BACHELOR OF COMPUTER APPLICATION (DATA SCIENCE) **(2022-2025)**

- Shri Ramswaroop Memorial University, Lucknow.

INTERMEDIATE **(2019-2022)**

- +2H/S Tiwaripur High School, Buxar, Bihar

PROJECTS

Student Study Portal - Online Learning Platform Using Django - Developed a user-friendly e-learning platform to streamline course enrolment, resource management, and feedback. Features include role-based access (Admin, Student), secure login, and course tracking. Future scope includes AI-driven recommendations and job consultancy.

Financial Market Production Using NLP - This project leverages Natural Language Processing (NLP) techniques to analyze financial news, social media sentiment, and historical market data to predict stock market trends. By extracting meaningful insights from unstructured text data, the model aims to enhance decision-making for investors and traders.

Banking Simulation Using Python (Tkinter & SQL)

Developed a GUI-based banking system with Admin and Customer roles, enabling secure login and efficient account management. Integrated SQL for database handling and implemented CRUD operations. Future enhancements include advanced security and online transaction support.

CERTIFICATION

- Introduction to Data Concepts — IBM
- Artificial Intelligence Fundamentals — IBM
- Linux — INFOSYS Springboard
- Python — PIE_INFOCOMM
