SHANTANU JAISWAL

+91-9026604714 — shantanu.jais2007@gmail.com — LinkedIn — GitHub

PROFESSIONAL SUMMARY

Computer Science student specializing in backend systems and AI-powered applications, with hands-on experience in Retrieval-Augmented Generation (RAG), LLM integration, and scalable API development. Proficient in Java, Python, and building AI-driven workflows using LangChain, vector databases, and RESTful services. Strong problem-solving ability with interest in AI platforms, distributed systems, and enterprise-scale software engineering.

EDUCATION

NIET, Greater Noida Nov 2022 – May 2026
Bachelor of Technology in Computer Science & Engineering

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL
AI/ML: RAG Pipelines, LLM Integration, LangChain, HuggingFace, Embeddings, Semantic Search
Frameworks: Spring Boot, Node.js, Express.js, React.js, FastAPI
Databases: MySQL, PostgreSQL, MongoDB, ChromaDB (Vector DB)
Tools: Git, Docker (Basics), Linux
Concepts: OOP, DSA, DBMS, OS, Computer Networks, REST APIs, Concurrency

KEY PROJECTS

PDF Insight – RAG Powered Document Assistant 2026
Python, FastAPI, Streamlit, ChromaDB, HuggingFace, LangChain

- Built an end-to-end **RAG pipeline** enabling semantic document querying using LLMs
- Implemented **embedding-based retrieval** with ChromaDB and MiniLM for contextual search
- Integrated HuggingFace LLM (Qwen) for **context-aware response generation**
- Designed FastAPI backend for real-time query processing and scalable API handling
- Optimized chunking and retrieval pipeline to improve response relevance and latency

MeshPay – Secure Java Transaction Simulator 2026
Java, Spring Boot, REST API, Concurrency

- Developed a backend payment simulation system with **concurrent-safe transaction handling**
- Implemented **idempotent processing** to ensure fault-tolerant transaction execution
- Simulated real-world **distributed transaction workflows**
- Designed modular REST APIs for secure and scalable backend processing

ScamSniper – Fraud Alert Platform 2025
JavaScript, HTML, CSS, VirusTotal API, Chrome Extensions API

- Built a browser extension to detect and highlight scam and malicious links
- Used VirusTotal API and keyword-based scoring to flag risky URLs
- Integrated third-party security APIs to analyze suspicious URLs and improve fraud awareness

ADDITIONAL

- Strong foundation in Data Structures and Algorithms with problem-solving practice
- Built and deployed AI-powered and backend systems using RAG and REST architectures
- Actively exploring LLM systems, RAG optimization, and AI workflows

CERTIFICATIONS

- Programming Using Java – Infosys Springboard
- Hands-on Introduction to Linux Commands and Shell Scripting – Coursera
- Python for Data Science, AI & Development – Coursera
- Introduction to Artificial Intelligence – Coursera
