EDUCATION

- **Noida Institute of Engineering and Technology** Greater Noida
  Bachelor of Technology –Computer Science and Engineering (2022-2026)

SKILLS

- **Programming:** Java (Core, OOP), Python.
- **Frontend Technologies :** HTML5, CSS3, JavaScript, ReactJS
- **Backend & APIs:** Spring Boot, REST APIs, WebSocket.
- **Tools & Technology :** Data Cleaning & Transformation, Structured Data Handling, SQL Query Optimization, Power BI , Tableau,Git & GitHub,AWS.
- **Database:** SQL.
- **Computer Science Fundamentals:** Computer Networks (CN), TCP/IP, Routing & Switching Basics, VLANs, OSPF Fundamentals, Ethernet, Network Troubleshooting, Cisco Packet.

INTERNSHIP

CANTILEVER – Python Programming Intern July 2024-Aug 2024 | Certificate

- Engineered GUI-based desktop applications using Python and Tkinter, including a personal finance manager, contact book, and expense tracker, showcasing hands-on experience with event-driven programming.
- Utilized SQL and file handling for structured and persistent data storage, supporting transaction logging, contact management, and dynamic data manipulation.
- Integrated matplotlib for generating real-time data visualizations (bar charts) based on categorized user input to enhance analytical insights.
- Applied modular function design, exception handling, and user input validation to create interactive, reliable, and user-friendly software solutions.

PROJECTS

MindMate – Intelligent Mental Wellness & Mood Tracking Platform MindMate-Link

- Tech Used: Java (Spring Boot), HTML, CSS, JavaScript, WebSocket, REST API, Render Cloud Deployment, Git & GitHub.
- Developed MindMate, an AI-powered Mental Health Support System that helps users track emotions, write journals, meditate, and interact with a real-time voice-enabled assistant. Built with modular backend architecture and a fully responsive, user-centric frontend.
- Includes features such as Mood Logging, AI-powered Journaling, Guided Meditation, Mental Health Assessment, Real-time AI Chat, Voice Assistant, Analytics Dashboard, Therapy Resources, and a Community Support Section for continuous emotional well-being.

Cab Comparison System: Oct 2024-Dec 2024

- Technologies Used: Android Studio, Java, XML, DrawerLayout, NavigationView, and AndroidX libraries for building a responsive and modern mobile application interface.
- Built a real-time fare comparison system that accepts source, and destination inputs and dynamically displays fare results using ListView.
- Integrated a hamburger menu with DrawerLayout and custom navigation XML to enhance user experience through smooth and organized in-app navigation.

CERTIFICATIONS

- ReactJs: Infosys
- Power BI : Infosys
- CCNA: Introduction to Networks : Cisco
- CCNA: Enterprise Networking, Security, and Automation : Cisco
- Introduction to Programming Using Python : COURSERA
- Hands-on Introduction to LINUX Commands and Shell Scripting : COURSERA
- Exploiting and Securing Vulnerabilities in Java Applications: COURSERA
