Summary

Data Analyst with hands-on experience in Business Intelligence, reporting analytics, and data visualization. Skilled in SQL, PL/SQL, Power BI, Excel, and Python to transform complex datasets into actionable insights. Proven ability to build KPI-driven dashboards, streamline reporting processes, and deliver data-driven solutions that enhance business performance and decision-making.

Skills

Programming & Querying: SQL, PL/SQL (Oracle), PostgreSQL, Python (Pandas, NumPy)
Data Visualization Tools: Advanced MS Excel, Power BI, Tableau
ETL & Data Integration: Informatica Cloud (IICS), ETL Pipelines, Data Mapping, Data Transformation
Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics
Reporting & BI Concepts: KPI Tracking, Dashboard Development, Data Storytelling, Business Insights

Experience

Data Analyst Intern **June 2025 – August 2025**
Zoho Corporation Private Limited, Noida (Hybrid) *Tools Used: Excel, SQL, Power BI, Informatica (IICS)*

- **Processed and standardized 8,000+ transaction records** to analyze sales trends and drop-out patterns, enabling better tracking of business performance.
- **Improved reporting efficiency by 25%** through structured data cleaning, validation, and transformation using Excel and SQL.
- **Defined and tracked key KPIs** (revenue, conversion rate, drop-out rate), contributing to a 15% improvement in decision-making for sales performance.
- Developed KPI-driven Power BI dashboards to visualize revenue trends, customer behavior, and monthly performance across business units.
- **Reduced reporting errors by 20%** by ensuring data accuracy and consistency across multiple data sources.
- Utilized **Informatica Cloud (IICS)** to support ETL workflows including data extraction, transformation, and loading for analytics reporting.

Projects

Fraud Detection System using IICS | *Informatica Cloud (IICS), SQL, ETL* **Jan 2026 – Apr 2026**

- Designed and developed an end-to-end ETL pipeline using Informatica Intelligent Cloud Services (IICS) for fraud detection.
- Performed data cleaning, transformation, and validation on large datasets to ensure data quality and consistency.
- Implemented fraud scoring logic and KPI aggregation to identify suspicious transactions and to generate actionable insights.
- Built taskflows and decision tasks to automate fraud detection workflows, alerts, and scheduling processes.
- Optimized data processing performance, enabling faster detection and real-time monitoring of fraudulent activities.

Blinkit Sales & Operations Dashboard | *Power BI, SQL* **Mar 2025 – Apr 2025**

- Analyzed 1 million records of Blinkit sales and operations data to identify trends in customer demand, delivery performance, and product categories.
- Built interactive Power BI dashboards with KPIs such as revenue, order volume, delivery time, and category-wise performance.
- Used SQL for data extraction and transformation, enabling efficient handling of large-scale datasets.
- Identified key insights like peak order hours, top-performing locations, and operational bottlenecks to support data-driven decisions.

Education

Bachelor of Technology (B.Tech) – Computer Science **2022 – 2026**
Dr. A.P.J Abdul Kalam Technical University (AKTU) *CGPA: 8.2 / 10*

Class XII (Senior Secondary) **2022**
Delhi Public School, Katra *Percentage: 87%*
