Summary

Aspiring AI Engineer and Software Development Engineer (SDE) with hands-on experience in AI automation, machine learning workflows, full-stack web development, and problem-solving.Experienced in building AI-driven automation workflows using n8n,integrating generative AI solutions

Education

2022 - 2026 B.Tech(CSE) at **IMS Engineering College, Ghaziabad U.P** (Percentage: 78.32)
2020 - 2021 Class 12th at **Dev Memorial Public School, Garhmukhteshwar U.P** (Percentage:79.5)
2018 - 2019 Class 10th at **ST. Anthony's School,Tatarpur Hapur, U.P** (percentage:86.5)

Skills

Technical Skills
- Languages: C, C++, Java, Python, JavaScript
- Web Technologies: HTML, CSS, JavaScript
- Databases: SQL, MySQL
- Tools Frameworks: Django, Web Scraping
- Other: OOP, Data Structures, Algorithms, LeetCode, GeeksForGeek

Personal Skills
- Can communicate well, both in writing and speaking
- Works well in a team
- Lead a project and manage time well
- Adapt to new situations and is eager to learn
- Good at working with others

Work Experience

AI and ML Intern June 2025 - present

Working as an AI and ML Intern in PatSwap Technologies LLP , During this internship created Multiple automated workflows which further used in Organizations core projects.

Projects

Price Comparison Management

- Tech Stack: Django, HTML, CSS, JavaScript, Web Scraper, MySQL
- Features: Real-time price comparison, user filters, MySQL database

Aim of the project was to build a website , which compare prices of the products from the different E-commerce website on a single website leads to time efficieny and customer support

AI Post Generation and Creation

Created two workflows using N8N automation tool, In the first workflow i.e AI post generation , a prompt is provided and AI agent generate the content text, along with video url and image In the second workflow the data of the first workflow is stored in the google sheet and second workflow uses the store data and post it on the LinkedIn, Twitter, Facebook Page and Instagram.
