Rohit Tyagi

Greater Noida, UP (Open to Relocation) / **+91 9808502045** / tyagirohit583@gmail.com / LinkedIn / GitHub

Professional Summary

- Software Engineer with hands-on experience building end-to-end applications using **Java, Spring Boot, and MySQL**. Strong interest in **Cloud Computing and DevOps**, with exposure to **AWS, Docker, and Linux** environments.
- Skilled in **RESTful API design, client-server architecture, and relational database systems**; familiar with cloud fundamentals (compute, storage, networking) and experienced in data processing and automation using **Python and SQL**.

Education

- **Noida Institute of Engineering and Technology** — Greater Noida, India
  B.Tech, Computer Science and Engineering (Expected 2026) — CGPA: 7.61/10 — *2022 – 2026*
  - Core Coursework: Data Structures, DBMS, Cloud Computing, Software Engineering, Operating Systems
- **SS Public School — Percentage: 75.4%** — Agra, Uttar Pradesh
  Senior Secondary (CBSE) — *2020 – 2022*

Professional Experience

- **Data Analyst Intern** — Remote
  ScholarRank Invithi Software — *Feb 2025 – Apr 2025*
  - Processed and analyzed **1M+ chatbot interaction records** using Python (Pandas) and SQL, identifying usage patterns that informed product analytics decisions.
  - Optimized ETL scripts, reducing analytics processing time by ~**30%** and reporting turnaround by ~**25%** for stakeholder dashboards.
  - Automated data validation checks across **3 analytics workflows**, cutting manual verification effort by ~**40%**.

Projects

- **Vehicle Rental and Management System [GitHub]** — Aug 2024 – Jan 2025
  Java, Spring Boot, Spring MVC, JDBC, MySQL, JSP, Bootstrap
  - Developed a multi-role web application (Admin/User) using **Java, Spring Boot, and Spring MVC** with session-based authentication and **role-based access control**.
  - Designed a **normalized MySQL schema (5 tables)** supporting vehicle inventory, booking lifecycle management, automated invoicing, and complaint tracking.
  - Built end-to-end booking flow with vehicle filters (type, price, availability), **invoice generation**, and an admin dashboard for monitoring bookings and analytics.
- **Prasthanam — Full Stack Travel Planning Application [GitHub]** — June 2024 – Aug 2024
  Node.js, Express.js, React.js, PostgreSQL, Google Gemini API, Leaflet.js
  - Built a full-stack travel planner with **RESTful APIs** (Express.js), **React.js** frontend, and **PostgreSQL** for persistent data storage, following a client-server architecture.
  - Integrated **Google Gemini API** to generate structured itinerary data in JSON format; implemented **server-side parsing and validation** before database persistence.
  - Developed interactive route visualization using **Leaflet.js**, trip dashboard with booking management, and **multilingual content rendering** (English, Hindi, Hinglish).

Achievements

- Finalist, **Smart India Hackathon (SIH)** Selected among top 30 teams at institute level
- Winner, **Code-HRS Hackathon** (Dec 2024)
- Member, **GDSC GenAI Lab**; completed Google Cloud Study Jam modules on cloud infrastructure.

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL
- **DevOps & Cloud:** AWS, Docker, Linux, Bash, Git, GitHub, Postman
- **Backend:** Spring Boot, Spring MVC, REST APIs, JDBC, Node.js, Express.js
- **Frontend:** React.js, HTML5, CSS3, Bootstrap, Leaflet.js
- **Databases:** PostgreSQL, MySQL
