Education

I.M.S. Engineering College, Ghaziabad

(B.Tech.) Computer Science Engineering - Artificial intelligent and Machine Learning

Percentage : 77.18%

Projects

1. **DyNUM**

Description : Dynum is a desktop virtual assistant powered by large language models. It executes commands via voice or text to automate tasks like opening apps or managing files. Future versions aim to bring ChatGPT-like conversations to your desktop for smarter interactions.

Role : Python Developer - Developed a desktop virtual assistant to automate system tasks using voice and text commands.

Technology Used : Python, Natural Language Processing(NLP),Speech Recognition,Text-to-Speech (TTS)

2. **Business Analytics-Sentiment Sales Insights**

Description : An AI-powered web platform that transforms audio calls into actionable insights by combining speech-to-text, sentiment analysis, and CRM data—empowering counseling teams to boost student engagement and drive smarter decisions with stunning visualizations.

Role : Data Analyst - Analyzed call data and sentiment trends to generate actionable sales and engagement insights for counseling teams.

Technology Used : Python, Speech-to-Text, Sentiment Analysis (NLP), Business Analytics, Data Visualization, CRM Data Integration, Web Technologies

3. **Adaptive Neuro-AI**

Description : An AI-driven BCI system decodes EEG signals into digital commands for hands-free, thought-based interaction. Using adaptive learning and self-healing mechanisms, it maintains accuracy despite signal variability, enabling reliable, real-time human-machine communication.

Role : Data Analyst - Analyzed EEG signal data to identify patterns, evaluate model performance, and support real-time decision-making in a brain–computer interface system.

Technology Used : Python, Data Analysis, EEG Signal Processing, Feature Extraction, Machine Learning, Data Visualization, Real-Time Data Handling

Skills

- Python Programming
- Libraries: NumPy, Pandas, Matplotlib, seaborn, Scikit-learn, PyTorch / TensorFlow (In Progress)
- MySQL Database
- Data Handling & Data Analysis
- Power BI (Data Visualization & Dashboards)
- MS Word, Excel & PowerPoint
- HTML & CSS (Basic Styling)
- Streamlit (Python-based UI Development)
- Data Science & Machine Learning (In Progress)
- Tools & Platforms: Jupyter Notebook, GitHub, VS Code, Google colab

Internship & Training

1. Robust Results Pvt Ltd
On Python - Basic to Advanced (01 Oct, 2023 - 11 Nov, 2023)

2. Q Academy
On Data Science Using Python (04 Dec, 2023 - 28 Feb, 2024)

3. Softpro India Computer Technologies (P) Ltd , Noida
On Machine Learning Using Python (25 Jun, 2025 - 15 Aug, 2025)

Certificate

• Advanced Python From IIT Kanpur
• Data Science Using python From QAcademy
• Machine Learning with Python from Softpro India, Noida
