Arpan Chauhan

Noida, India | 9027319120 | arpanchauhanarpanchauhan@gmail.com | LinkedIn: Arpan Chauhan | GitHub: github.com/ArpanChauhan12

CAREER OBJECTIVE

Motivated B.Tech Computer Science student specializing in Data Analytics and Data Science, with hands-on experience in Python, SQL, Machine Learning, and Power BI. Passionate about transforming complex data into actionable insights, I seek to contribute my skills in predictive modeling and data-driven decision-making to a forward-thinking organization where I can grow and create measurable impact.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Expected Graduation: 2026

IMS Engineering College, Ghaziabad | AKTU, Lucknow | CGPA: 7.4/10

- Class XII (UP Board): 81.6%
- Class X (UP Board): 81.8%

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **ML Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow
- **Machine Learning:** Regression, Classification, Clustering, Feature Engineering, Model Evaluation (R^2, RMSE)
- **Data Analytics & BI:** Power BI, MS Excel (Pivot Tables, VLOOKUP), Data Cleaning, Dashboard Development
- **Web Development:** Flask (REST APIs, web applications)

INTERNSHIP EXPERIENCE

Data Analytics Intern — Edgenius Skillfied Mentor Pvt. Ltd. July 2025 – September 2025

- Cleaned, transformed, and analyzed real-world datasets using Python (Pandas, NumPy) and SQL
- Built Power BI dashboards for business reporting; identified key trends through EDA
- Delivered data-driven insights and reports to support stakeholder decision-making

Certificate No: 6c953814-4fe6-47af-b6e2-4818f5915821

PROJECTS

E-Commerce Sales Analytics Dashboard | Tools: Power BI, Excel

- Built an interactive dashboard with KPIs, slicers, and drill-throughs for sales performance analysis
- Identified top products and seasonal trends to support inventory and revenue decisions

Traffic Accident Analysis & Hotspot Detection | Tools: Python, Pandas, Matplotlib, K-Means

- Analyzed accident data to find patterns by time, location, and weather using EDA
- Applied K-Means clustering to detect high-risk road zones; visualized hotspots with Seaborn

Car Price Predictor | Tools: Python, Scikit-learn, Flask

- Built a Random Forest regression model achieving ~87% R^2 accuracy on 10,000+ records
- Performed feature engineering and EDA; deployed model via Flask web interface

House Price Predictor | Tools: Python, XGBoost, Scikit-learn

- Trained Linear Regression and XGBoost models; evaluated with RMSE and R^2 metrics
- Handled missing values, outliers, and multicollinearity during preprocessing

Movie Recommendation System | Tools: Python, Scikit-learn, Flask

- Built content-based filtering using TF-IDF vectorizer and cosine similarity on movie metadata
- Deployed as a Flask web app for personalized movie recommendations

CERTIFICATIONS

- **Data Analyst Certificate** — OneRoadmap | May 2025 | ID: CERT 45FD9F30
- **Introduction to Data Visualization** — SkillUp | June 2025 | Code: 8442889
- **Decode Python with DSA** — Physics Wallah | September 2025

ACHIEVEMENTS & EXTRA-CURRICULAR

- Participated in inter-college tech fests and coding competitions
- Quick learner; effective both in independent and team-based work environments
