EXPERIENCE

Salesforce Developer
Noida, India

Cloud Analogy
09/2025 - 03/2026

- **Designed and developed scalable Apex classes** following best practices, ensuring compliance with Salesforce **Governor Limits** and large data volumes.
- **Implemented bulkified Apex Triggers using a single-trigger-per-object** framework with handler classes for maintainability and reusability.
- Built **Lightning Web Components (LWC)** to deliver responsive, user-friendly interfaces aligned with **SLDS standards**.
- **Optimized performance by leveraging SOQL best practices,** avoiding queries/DML inside loops, and using **Maps and Sets** efficiently.

Software Developer
Lucknow

Urbanfeat Technologies
03/2024 - 09/2025

- **Engineered a live cross-platform web app using Flutter**, delivering high performance and an intuitive user experience.
- **Built robust RESTful APIs with Node.js**, enabling efficient data flow and seamless integration with PostgreSQL for optimized storage and retrieval.
- **Integrated Firebase services** (Cloud Messaging, Auth) to enable real-time data sync, secure login, and push notifications.

EDUCATION

Masters of Computer Applications
Noida, India

Noida Institute of Engineering and Technology
09/2024 - Present

Bachelors of Computer Applications
Lucknow, India

National Post Graduate College
10/2021 - 05/2024

SKILLS

Java, Dart, Python, Flutter, SQL, PostgreSQL, Firebase, MongoDB, Salesforce, Apex, Salesforce LWC, STLC, SDLC, POSTMAN, GitHub

TRAINING / COURSES

Salesforce Training
Completed Salesforce Training and gained knowledge about how the tool works in both administrator and developer end.

AICTE IBM SkillsBuild Data Analytics
Completed a data analytics internship, utilizing real-world datasets to perform statistical analysis and visualize insights, strengthening analytical and data interpretation skills.

TCS Youth Employment Program
Completed TCS YEP Training, enhancing communication, leadership, and teamwork skills to excel in dynamic corporate environments.

PROJECTS

Euphora
03/2025 - 07/2025

- **Refined an AI-driven learning platform "Euphora"** featuring a sleek glassmorphic UI with Firebase as the backend, enabling real-time user authentication, data storage, and seamless learning experiences.
- **Enforced interactive dashboard and quiz analytics** using Firebase for data handling, delivering personalized learning insights and performance tracking for users.
- **Integrated Firebase authentication and database services** to manage user sessions, course data, and AI-driven chatbot queries for enhanced learning engagement.

ClosetHunt - The Mall App
11/2023 - 04/2024

- **Developed a high-performance Android app using Flutter**, integrating **Razorpay** for seamless in-app payments and **Cloud Firestore** for scalable and efficient real-time data management.
- **Applied Firebase Cloud Messaging (FCM)** to deliver real-time updates and notifications, resulting in a **15% increase in user engagement**.
- **Ensured secure user authentication and data access** by following best practices with **Firebase Authentication**, maintaining a robust and safe app environment.
