CAREER OBJECTIVE

Motivated and enthusiastic Computer Science undergraduate with a solid foundation in programming and problem-solving.
Passionate about developing innovative software solutions and eager to apply technical skills in a challenging IT environment. Seeking opportunities to contribute to a dynamic organization while continuously learning and growing.

EDUCATION

- B.Tech in Computer Science and Business System, NIET, Greater Noida (2022–2026, Pursuing)
- Intermediate (12th Grade), St.Paul's School, Chhibramau, Kannauj (CBSE), Completed in 2022
- Matriculation (10th Grade), St. Paul's School, Chhibramau, Kannauj (CBSE), Completed in 2020

TECHNICAL SKILSS

- Language: Java
- Web Tech : HTML, CSS
- Framework: Database: SQL
- Tools/ Platforms: Git, VS Code, Eclipse, Spring Tool Suit.

LANGUAGES

- English
- Hindi

EXPERIENCE

- **CodSoft** – Online Internship

Worked on mini-projects and programming tasks focusing on Java and problem- solving.

- **IDEALAB**, **NIET** – On-Campus Internship

Gained exposure to real-world project environments and collaboration.

CERTIFICATIONS

- Coursera – Data Structures Infosys
- Springboard – DBMS Java
- Programming Fundamentals

CORE COMPETENCIES

- Problem Solving Team
- Collaboration
- Adaptability
- Analytical Thinking
- Eagerness to Learn

PROJECTS

- **Doctors Appointment & Disease Prediction System**

Tech Stack: Java, Spring Boot, Spring Security, Thymeleaf, MySQL, HTML, CSS.
A full-stack web application that enables users to find doctors, book appointments, and get possible disease predictions based on entered symptoms. The system provides secure authentication with Spring Security and separate dashboards for doctors and patients.

- **News AI App: AI-Powered Fake News Detection System**

Tech Stack: Java, Spring Boot, Spring Security , Thymeleaf, MySQL, Groq/OpenAI API, SMTP. An AI-based web application that verifies the authenticity of online news articles. It uses Groq/OpenAI API to analyze the content and classify it as fake or verified, helping users identify misinformation
