ANKITA KUKSHAL

FRESHER DATA ANALYST | POWER BI | SQL | PYTHON | DASHBOARD DEVELOPMENT
Greater Noida, India | +91-8923037623
✉Email | LinkedIn | Github

PROFESSIONAL SUMMARY

Detail-oriented **B.Sc. Computer Science student** with good skills in **Data Analytics, Business Intelligence, and Dashboard Development**. Working knowledge of **Power BI, SQL, Python, Excel, MySQL, DAX, and Power Query** with hands-on experience in building interactive dashboards, data cleaning, KPI reporting, and trend analysis. Demonstrated ability to transform raw datasets into actionable business insights through data visualization and performance metrics. Seeking a **fresher Data Analyst opportunity** to apply academic knowledge, strengthen analytical skills, and contribute to data-driven business decisions through meaningful insights and reporting support.

TECHNICAL SKILLS

- **BI & Visualization Tools:** Power BI, Power Query, DAX, Excel, KPI Reporting
- **Programming:** Python
- **Database & Querying:** SQL, MySQL
- **Libraries:** NumPy
- **Data Analysis:** Data Cleaning, Data Transformation, Trend Analysis, Dashboard Development, Reporting Automation
- **Tools & Platforms:** GitHub, VS Code, Microsoft Office

EDUCATION

Bachelor of Science in Computer Science (B.Sc. CS)
GNIOT, Greater Noida | 2023 – 2026

Class XII (CBSE): 91.6%
Navyug Public School, Kotdwara, Uttarakhand | 2021

PROJECTS

Blinkit Sales Analysis Dashboard | Power BI GitHub

• Built an interactive Blinkit Sales Dashboard in Power BI to analyze $1.20M sales, 9K items, outlet performance, and customer buying trends using KPI cards, slicers, and DAX measures.
• Developed outlet-wise, fat content, and item category analysis dashboards to identify top-performing segments and support retail decision-making.
• Created yearly outlet establishment trend visuals and detailed product-level reporting to derive actionable business insights.

Tech Stack: Power BI, Power Query, DAX, Data Visualization, Data Cleaning

PhonePe Transaction Analysis Dashboard | Power BI GitHub

• Developed a PhonePe Financial Analytics Dashboard in Power BI to analyze digital payments, money transfers, loans, insurance, recharge & bill services, and failed payment trends.
• Created service-wise KPI dashboards for transaction amount, payment success rate, and monthly fintech usage trends using Power Query and DAX.
• Identified failed payment reasons, service adoption patterns, and seasonal transaction spikes to support fintech business insights.

Tech Stack: Power BI, Power Query, DAX, SQL Concepts, Dashboard Development

OLA Ride Analytics Dashboard | Power BI GitHub

• Built an Ola Ride Analytics Dashboard in Power BI to monitor bookings, revenue, vehicle performance, trip distance, cancellations, and customer/driver ratings.
• Developed vehicle-wise revenue, payment method analysis, and cancellation reason dashboards to improve ride success and service quality insights.
• Designed rating and trip trend analysis reports to compare vehicle performance and enhance customer experience monitoring.

Tech Stack: Power BI, Power Query, DAX, Data Visualization, Business Intelligence

CERTIFICATIONS

- NPTEL – Python for Data Science
- Simplilearn – SQL for Data Analysis
- Infosys Springboard – Basics of Python

CORE COMPETENCIES

- Data Visualization
- Dashboard Development
- KPI Reporting
- SQL Querying
- Analytical Thinking
- Problem Solving
