HARSHIT MALIK

Noida, Uttar Pradesh, India | +91 9953972820 | harshitmalik2004@gmail.com

PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate with a good grasp in C++, and Solidity smart contract development. Demonstrated hands-on experience in building RESTful backend systems, automated communication pipelines, and decentralized blockchain applications.

EXPERIENCE

Backend Development Internship

Dievas Technology Pvt. Ltd. | *feb 2026 – Present*

- Designed and developed a RESTful API architecture to handle core application workflows, ensuring clean endpoint structuring, proper HTTP method usage, and robust error handling.
- Implemented an automated email dispatch system capable of sending bulk and scheduled notifications, significantly reducing manual overhead and improving communication reliability.
- Integrated third-party SMTP services and configured templated email workflows for transactional and promotional use cases.

C++ Virtual Internship

Codsoft | *Oct 2023 – Nov 2023*

- Deepened expertise in core C++ concepts including Object-Oriented Programming principles, Standard Template Library (STL) containers, and algorithmic efficiency.
- Produced optimized, well-documented code adhering to industry-standard readability and maintainability practices.

PROJECTS

Dead Man's Switch – Blockchain Smart Contract

Solidity | *Apr 2025 – Jun 2025*

- Architected and deployed a Solidity-based smart contract that automates the secure transfer of cryptocurrency assets following a configurable period of owner inactivity.
- Implemented advanced contract features including *require* statements, and custom access-control modifiers to ensure contract integrity and security.

EDUCATION

B. Tech – Computer Science & Business Systems

Noida Institute of Engineering and Technology, Greater Noida

Senior Secondary & Higher Secondary

Sapphire International School, Noida

CERTIFICATIONS

- Blockchain 101 – Introduction to Blockchain Technology
- Data Analytics Job Simulation – Deloitte Australia (via Forage, Jul 2025): Completed a real-world simulation involving forensic data analysis; built an interactive Tableau dashboard and applied Excel-based data classification to derive actionable business insights.

TECHNICAL SKILLS

Languages: C++, Solidity, SQL

Backend: REST API Design, SMTP / Email Automation

Blockchain Tools: Remix IDE, MetaMask
