Career Objective

- engineering graduate with internship experience in solar performance engineering and a strong interest in data analytics and renewable energy. Eager to contribute to innovative projects while continuously learning and growing in a dynamic environment.

ACADEMIC DETAILS

Year	Degree	Institute	CGPA/%
Sept 2022 - present	*B.Tech in Computer Science*	*IMS Engineering College, Ghaziabad*	*7.3*
2022	*12t, CBSE*	*St. Xavier's high school, Balrampur*	*77*
2020	*10th, CBSE*	*St. Xavier's high school, Balrampur*	*82*

CERTIFICATIONS

- Web Development and Team Collaboration – CEPTA Infotech (2024)

- Certified in group discussions, leadership, and cultural event management at zonal level

TECHNICAL SKILLS

- **Languages:** Python, SQL, Java, C
- **Libraries/Frameworks:** Pandas, NumPy, Matplotlib, OpenCV, AWS
- **Tools:** Power BI, MS Exce, Postman, Hoppscotchl
- **Database:** MySQL, MongoDB, Dbeaverl
- **Core Skills:** Data Analysis, Data Cleaning, Data Preprocessing, EDA, Data Visualization, Problem Solving
- **Domain Knowledge:** Solar Performance Analysis, KPI Monitoring (PR, Generation)

PROJECT

- **Heart Disease Prediction Analysis**
  (Nov 2024 - Dec 2024)
  - Objective :To analyze patient health data and identify key risk factors contributing to heart disease. .
  - Built a supervised machine learning model using Scikit-learn with 87% accuracy.
  - Conducted data preprocessing, feature selection, and model evaluation (confusion matrix, recall, precision).Used Matplotlib and Seaborn for visualizing key health indicators and patterns.

- **Driver Drowsiness Detection System**
  (Oct 2025 - Mar 2026)
  - Developed a real-time driver drowsiness detection system using computer vision techniques to improve road safety .
  - Implemented facial landmark detection to track eye movements and identify drowsiness based on eye closure duration
  - Built the system using Python, OpenCV, and Dlib, enabling real-time video processing
  - Designed an alert mechanism (alarm system) to notify the driver when drowsiness is detected
  - Applied concepts like Eye Aspect Ratio (EAR) for accurate fatigue detection

WORK EXPERIENCE

- **Data Analyst Intern,** AO Software Solution — Jul 2025 – Aug 2025

    - Completed a 6-week internship focused on data analysis and real-world applications
    - Applied data processing and analysis techniques to derive meaningful insights
    - Analyzed datasets to identify trends, patterns, and actionable insights
    - Enhanced problem-solving skills through analytical thinking and data interpretation
    - Gained exposure to modern tools and technologies in the data analytics domain
    - Demonstrated strong learning ability, adaptability, and attention to detail
- **Data Science and Performance Intern,** Smarthelio Pvt. ltd. Sep 2025 – Mar 2026
    - Completed a 6-month internship at SmartHelio Pvt. Ltd. in the Solar Performance Engineering Data Science Department
    - Performed solar performance analysis to evaluate plant efficiency and identify underperformance issues
    - Worked on data handling and validation, ensuring accuracy and consistency in large datasets
    - Assisted in data reporting and analysis, contributing to performance monitoring of solar plants
    - Developed understanding of solar KPIs such as PR (Performance Ratio), generation trends, and fault analysis
    - Maintained professional conduct and effective teamwork in a corporate environment+

ACHIEVEMENTS

- Captain, College Basketball Team (2025–26): Led training, match strategies; Runner-Up at Zonal Tournament 2024
- Member, Ignite Club (2023): Brainstormed and led multiple event planning initiatives
- Volunteer, College Cultural and Technical Events (2022–25): Managed logistics and coordination
- Performer, Singing, Dance and Sports Competitions (2022–25): Participated in group and solo events.
