Professional Summary

Resourceful and forward-thinking Software Developer specializing in Artificial Intelligence and Machine Learning. Skilled at building efficient software solutions, optimizing performance, and working collaboratively in dynamic team environments. Passionate about leveraging problem-solving abilities and technical expertise to create impactful applications. Dedicated to continuous learning and staying ahead with emerging technologies.

Education

Bachelor in Technology in Computer Science & Engineering [IMS Engineering College] | (2022- 2026)

Specialization: Artificial Intelligence and Machine Learning

- Relevant Coursework: Data Structures, Database Management Systems, Machine Learning, Artificial Intelligence

Class 12 (CBSE Board) [Gayatri Public School]

- Passed in 2021 securing 88.2%

Class 10 (CBSE Board) [Agra Public School]

- Passed in 2019 securing 93.2%

Work Experience

Machine Learning Intern| CodeAlpha

• Completed a **3-month** internship as a Machine Learning Intern at CodeAlpha.

• Built and evaluated ML models using **scikit-learn**, including **Linear Regression, Decision Trees, and K-Means clustering**

• Applied supervised and unsupervised learning techniques to real-world datasets.

• Gained hands-on experience with **Python, NumPy, Pandas,** and scikit-learn for model development and analysis.

• Successfully completed assigned projects and received a Certificate of Completion.

Skills

• Programming Languages: **Python, C, Java.**

• Databases: **SQL**, **MongoDB**.

• Libraries & Tools: **NumPy, Pandas, Matplotlib, scikit-learn, Jupyter.**

• Fundamentals: Strong understanding of algorithms, **data structures**, and software design principles.

• **Machine Learning**: Basic understanding of ML and **Deep Learning modelling**, **Time-Series Methods.**

• Data Analysis & Visualization: **Power BI, MS Excel, Exploratory Data Analysis (EDA), Feature Engineering.**

• Problem-Solving: Excellent analytical and problem-solving skills with a proactive approach.

• Software Development Tools: Familiarity with version control systems (Git) and IDEs

• Communication: Effective collaborator with good verbal and written communication skills.

• Team Collaboration: Works well in a team setting, contributing to project objectives

Projects

Coffee Store Analysis

- Objective: Analysis of items sold in coffee store and create a working dashboard of it.
- Role: Led the project as a developer responsible for creating dashboard.
- Skills Utilized: Excel, Pivot tables, Charts
- Impact: Provide a clear view to analyse data by designing interactive features that improved user experience.

FRIDAY: A Virtual Assistant

- Objective: Developed an AI-powered virtual assistant capable of natural language understanding.
- Role: Led the project as a developer responsible for programming the assistant's response system.
- Skills Utilized: Python, machine learning algorithms, natural language processing.
- Impact: Enhanced user engagement by designing interactive features that improved user experience.

Sign Language Recognition System

- Objective: Created a system to translate sign language into text using computer vision techniques.
- Role: Collaborated with team members to analyse gestures and build a model to recognize hand signs.
- Skills Utilized: Python, machine learning, and data preprocessing.
- Outcome: Improved accessibility for hearing-impaired individuals through effective communication tools.

Certifications and Awards

Python Course Kaggle 2024

- Developed command in python language by using various libraries and modules.

Intro to SQL Course Kaggle 2024

- Knowing the basic features of SQL for database management.
