EDUCATION

Currently pursuing Master of Computer Applications at **Invertis University** (**2025–2027**).
Completed Bachelor of Computer Applications (BCA) in **2025** with a **CGPA of 6.8** from **Invertis University**.
Completed Senior Secondary (12th) in **2022** with a score of **67%** from **Dr S P Vidyasthali Shahjahanpur**.
Completed Higher Secondary (10th) in **2020** with a score of **85%** from **Dr S P Vidyasthali Shahjahanpur**.

INTERNSHIP

CodSoft **Remote**
Python with AI & ML Intern **July 2024 – Aug 2024**
Developed predictive models and performed exploratory data analysis (EDA) using the **Python** ecosystem.
Automated data preprocessing workflows using **Pandas** and **NumPy**, improving data cleaning efficiency.
Participated in technical simulations to resolve real-world computational challenges in AI/ML environments.

PROJECTS

Credit Card Fraud Analysis | **Power BI, Python, Data Cleaning** **Team Project**
4 Weeks

Orchestrated the end-to-end data cleaning and processing of financial datasets to identify transaction anomalies.
Developed dynamic **Power BI** dashboards to visualize fraud risk metrics and enhance financial monitoring systems.
Leveraged **Python** for statistical analysis to identify key features indicative of fraudulent activities.

Home Automation System (IoT) | **Tinkercad, IoT Sensors, Arduino** **Individual Project**
4 Weeks

Designed a smart environment simulation integrating **PIR** and **temperature sensors** for automated climate control.
Implemented logic in **Arduino** for resource optimization, reducing simulated energy consumption.
Validated hardware-software integration for scalable home security and automation solutions.

ThingWorx Mashup Creation | **PTC ThingWorx, IoT Cloud** **Academic Project**
4 Weeks

Architected interactive dashboards (**Mashups**) to visualize real-time IoT data streams from connected devices.
Focused on user-centric UI design to facilitate intuitive device health monitoring and data interaction.

SKILLS

- Programming Languages: **Python** (Advanced), **HTML5**, **CSS3**, **JavaScript** (Basic), **SQL**
- AI/ML & Data: **Pandas**, **NumPy**, **Scikit-learn**, **Prompt Engineering (LLMs)**, **Matplotlib**
- Tools & IDEs: **VS Code**, **Jupyter Notebook**, **Anaconda**, **Google Colab**, **GitHub**, **CLI**
- IoT & Prototyping: **PTC ThingWorx** (Mashups), **Tinkercad** (Sensors & Arduino)
- Databases & Visualization: **MySQL**, **MySQL Workbench**, **Power BI**

ACHIEVEMENTS

- **Research:** Attended the **4th International Conference on Advanced Computing (ICACTA-2025)** organized in collaboration with **Howard University, Washington DC, USA**.
- **Workshop:** Successfully completed a **Cyber Security Awareness Program** organized by **Innovative Ideas Infotech** in association with **UP POLICE** in **2022**.
- **Nomination:** Nominated for academic excellence and outstanding contribution to technical projects at **Invertis University**.

CERTIFICATIONS

- **Introduction to IoT using ThingWorx** – Project-based Training by **DCS** (**Jan 2023 – June 2023**).
- **Python with AI & ML** – Industrial Training Certification by **CodSoft**.
- **Internet of Things & its Applications** – Technical Workshop Certification.
- **Python for Data Science and Machine Learning** – Academic Certification.
