Summary

Motivated Computer Science student with strong skills in programming, DSA, and full-stack development. Experienced in building scalable applications including an Event Booking System and AI-based medical imaging solution. Quick learner with strong problem-solving ability, seeking a software engineering role.

Experience

Pre Placement Trainee – Skill Risers Pvt. Ltd. July 2025 – Sept 2025

- Worked on complete SDLC including development, testing, and deployment.
- Built full-stack apps using React.js, Node.js, Express, MongoDB.
- Implemented JWT-based authentication and REST APIs.
- Performed API testing using Postman.

Projects

AI-Based Chest X-Ray Disease Detection System

- Built ResNet50 model for classifying X-ray images into 4 disease categories.
- Used Grad-CAM for explainable AI and visualization.
- Achieved 90% accuracy on test data.

Event Ticket Booking System – MERN Stack

- Developed booking platform using React, Node.js, MongoDB.
- Implemented authentication and REST APIs.

Pizza Shop Web Application

- Designed responsive UI using HTML, CSS, Bootstrap.
- Implemented frontend logic using JavaScript.

Education

B.Tech CSE 2022–2026 IMS Engineering College, Ghaziabad
CGPA: 7.55

Class 12th (UP Board) – 71.6% 2021 Class 10th (UP Board) – 70.8% 2019

Technical Skills

Languages:	Java, JavaScript, SQL
Web:	HTML, CSS, React.js, Node.js, Express.js
Concepts:	DSA, OOPS, SDLC, REST APIs
Database:	MySQL, MongoDB
Tools:	Git, GitHub, VS Code

Certifications

Data Analytics (Python), Power BI, DSA Training

Research

ResNet50-Based Chest X-ray Classification with Grad-CAM (Accepted)
First Author – IEEE CE2CT 2026

- Developed deep learning model for disease detection.
- Integrated explainable AI using Grad-CAM.
