Projects

SMART DOOR LOCK SYSTEM- IOT HOME AUTOMATION

Developed an IoT-based smart door lock system enabling remote access, real-time monitoring, and multi-factor authentication using ESP8266/ESP32. The project enhances security and convenience through automation, alerts, and access logging, making it suitable for smart homes and offices

ATTENDANCE MONITORING SYSTEM USING RFID AN SMS NOTIFICATION

Developed an automated attendance monitoring system using RFID technology with real-time SMS notifications. The system reduces manual errors, prevents proxy attendance, and improves transparency through instant alerts and digital record management.

PRICING PATTERN SHIFT IN REAL ESTATE

Analyzed pricing pattern shifts in the real estate sector by evaluating demand–supply trends, location factors, and economic indicators. The study highlights market fluctuations and provides insights to support data-driven investment and policy decisions.
