Languages & Tools	Python, SQL, Excel, Power BI	**ML / AI**	Scikit-learn, K-Means, Regression, Classification
Data Analysis	Pandas, NumPy, EDA, Data Cleaning	**Visualization**	Matplotlib, Seaborn, Power BI Dashboards
Databases	MySQL, SQL Querying, Joins, Aggregations	**Soft Skills**	Problem Solving, Analytical Thinking, Communication

PROJECTS

Customer Segmentation using K-Means Clustering

Python • Scikit-learn • Pandas • Matplotlib

- Applied K-Means Clustering on customer behavioral & demographic data to identify distinct customer segments.
- Used the Elbow Method to determine the optimal number of clusters, improving model accuracy.
- Performed EDA to uncover data distributions, outliers, and correlations across key variables.
- Visualized segments with scatter plots and pair plots, enabling actionable marketing & retention strategies.

Sales Performance Dashboard

Power BI • Excel • SQL

- Designed an interactive Power BI dashboard tracking KPIs such as revenue, customer churn, and regional sales trends.
- Cleaned and transformed raw sales data using SQL queries and Excel to ensure data integrity before visualization.
- Delivered insights that helped identify top-performing regions and underperforming product categories.
