Vishal Shishodia

Dadri, Uttar Pradesh
+91-8810313007 | vishalshishodia57@gmail.com | linkedin.com/in/vishalshishodia | github.com/shishodiia0

Education

Noida Institute of Engineering Technology — Greater Noida
B.Tech Computer Science and Business Systems — CGPA: **8.2 / 10** — *Nov 2022 – Jun 2026*

Shaffali Public School — Dadri
CBSE — PCM + Computer Science — *Jul 2020 – May 2022*

Experience

LLM Post Training Intern — Jan 2026 – Mar 2026
Ethara AI (Green Rider Technology LLP)

- Evaluated 500+ model-generated coding responses and curated 200+ SFT training samples directly used in fine-tuning cycles, contributing to measurable reduction in instruction-following error patterns

Projects

User Engagement Analytics Platform | Live | GitHub
FastAPI, PostgreSQL, Snowflake, ETL, Streamlit, Docker, AWS EC2, GitHub Actions, Pytest

- Designed OLTP/OLAP separated architecture — benchmarked 3.67x DAU query degradation (6.49ms → 23.84ms) at 100K events; built incremental watermark ETL pipeline syncing to Snowflake every 10 minutes with zero duplicates via MERGE
- Developed 12 JWT-secured REST APIs with bcrypt, rate limiting (30 req/min), and 49 automated tests (100% pass rate) using Pytest with SQLite in-memory isolation
- Deployed on AWS EC2 using Docker Compose and Nginx with automated CI/CD via GitHub Actions — tests run on every push before deployment

Social Media Backend API | Live | GitHub
FastAPI, PostgreSQL, SQLAlchemy, Alembic, JWT, Docker, GitHub Actions, Pytest

- Built production-grade API for posts, users, voting, and social feed with modular router architecture and SQL JOIN optimized queries fetching posts with vote counts in single database round trip
- Implemented Alembic migrations for version-controlled schema management, JWT + OAuth2 authentication with ownership validation, comprehensive Pytest suite with fixtures and isolated test database
- Containerized with Docker Compose, automated CI/CD via GitHub Actions — tests run on every push before deployment

Secure File Sharing System | Live | GitHub
FastAPI, PostgreSQL, JWT, Fernet Encryption, Docker

- Built role-based file sharing API (Ops/Client RBAC) with JWT auth, bcrypt hashing, email verification, and Fernet encrypted download links
- Deployed on Render with Docker containerization and environment-based configuration management

Technical Skills

Languages: Python, SQL, C++
Backend: FastAPI, REST API Design, Pydantic, OAuth2, SQLAlchemy ORM, Alembic
Databases: PostgreSQL, Snowflake
Data Engineering: ETL Pipeline Design, OLTP/OLAP Separation, Incremental Data Sync, Data Warehousing
Cloud & DevOps: AWS EC2, Docker, Docker Compose, Nginx, GitHub Actions
Security & Testing: JWT, bcrypt, RBAC, Rate Limiting, Pytest, HTTPX, Test Isolation
AI/ML: LLM Evaluation, Prompt Engineering, SFT, Dataset Curation
Tools: Git, Postman

Extracurricular

Student Ambassador — THE ACE '24 (AI & Blockchain National Tech Fest)
Volleyball Team Member — College and local tournaments
