Education

IMS Engineering College **July 2022 – July 2026**
Bachelor of Technology in Computer Science and Design – CGPA: 7.6 *Ghaziabad, India*

- Courses: Object Oriented Programming, Operating Systems, Data Structures and Database Management System

Chhapra Central School **March 2021 – June 2022**
Senior Secondary (Class XII), CBSE Board – Percentage: 80.2 *Bihar, India*

Experience

Brain Mentors Pvt. Ltd. **July 2025 – August 2025**
Web Development Trainee *Ghaziabad, Uttar Pradesh*

- Completed comprehensive training in Full Stack Web Development and basics of Data Structures & Algorithms, achieving 90% performance across module assessments.
- Developed a full stack Netflix Clone web application as a capstone project, implementing responsive UI, RESTful APIs, and database integration using React.js, Node.js, Express.js, and MongoDB.
- Collaborated within a 4-member team using Agile methodology and version control via Git/GitHub.

Projects

Swasthya Setu | *WebRTC, Zustand, Next.js, Typescript, Zod, TailwindCSS, React Three Fiber, MongoDB* **Demo**

- Developed an AI-driven telehealth platform integrating a chatbot, 3D symptom checker, doctor consultations, health blogs, and emergency services into a unified healthcare system.
- Built a 3D AI symptom checker covering 50+ body regions with >95% accuracy and <2 s response time.
- Built an AI health assistant with multimodal text and image analysis, reaching >85% accuracy and < 500 ms latency for chat history retrieval.
- Built a unified doctor consultation module with WebRTC-based doctor video/chat consultations, Google Maps powered emergency services, and an integrated health blog system.

MockVibe | *React.js, Express.js, Google Cloud STT, MediaRecorder API, WebRTC* **Demo | Github**

- Built an AI-powered mock interview platform supporting text, voice, and video-based interviews, simulating real-world interview scenarios with configurable roles, difficulty levels, and interviewer styles.
- Integrated Google Gemini API for adaptive question generation, follow-up logic, and answer evaluation, along with Google Cloud Speech-to-Text for voice transcription and speech analysis.
- Delivered detailed post-interview analytics including content accuracy, speech patterns, non-verbal cues, strengths, weaknesses, scores, and personalized improvement recommendations using the MERN stack with secure JWT authentication.

KisanBazar | *React, Node.js, Express.js, JWT, Google OAuth, Socket.IO, Razorpay* **Demo | Github**

- Built a responsive React.js interface with real-time order updates, farmer–buyer chat, and shipment tracking dashboards for an improved user experience.
- Implemented JWT & Google OAuth authentication, real-time chat, and time-bound shipment tracking APIs
- Developed a responsive React.js UI and deployed the application on Vercel and Render with secure backend integration.

Skills

Programming Languages: Java, JavaScript, SQL, TypeScript
Frontend: Next.js, React.js, TailwindCSS, HTML, CSS, Redux, Zustand
Backend: Node.js, Express.js, MongoDB, Socket.io, WebRTC, RESTful APIs
Tools and Technologies: Git & GitHub, Zod, Vercel, JWT, Postman, Razorpay

Achievements

- Winner, Smart India Hackathon 2024 – NIA Problem Statement **Certificate**
- Practiced DSA consistently on **LeetCode**, solving 100+ problems and achieving the 2025 50-Day Badge for daily coding discipline.
- Filed and published a patent titled **"Alcohol Detection"** during first year of college (Application No. 202211074484).
