APARNA MISHRA

GHAZIABAD, U.P., India | +91-9266498415 |aparnamishra7830@gmail.com|

Career Objective

Motivated and detail-oriented B.Tech graduate seeking an opportunity to begin my career in a growth-oriented organization. Where I can learn, adapt, and contribute to achieving company goals.

EDUCATION

- **B.TECH ,Computer Science & Engineering from IMS Engineering College, Ghaziabad**.
- **Diploma in Mechanical CAD from Govt .Poly,GHAZIABAD| 20 2 2 .**

Technical Skills

- **Programming:** Python, SQL ,Java
- **DevOps Tools**: Git, Docker, Jenkins, AWS, CI/CD, Linux, Kubernetes (basic).
- **Data Analytics Tools:** Power BI, Excel, Tableau, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.
- **Other Tools:** Jupyter Notebook, VS Code.

PROJECTS

Automated Deployment Pipeline using Jenkins & Docker

- Built CI/CD pipeline integrating Git, Jenkins, Docker, and AWS EC2.
- Configured GitHub webhooks for automated build triggers.
- Improved deployment efficiency and minimized manual errors.

AI Bias Detection for Healthcare (Heart Disease Prediction)

- Designed bias detection model using Python, Pandas, Scikit-learn, and Matplotlib.
- Analyzed dataset for bias and fairness using visualization and metrics.
- Applied bias mitigation methods for improved model fairness.

Banking Automation System

- Developed GUI-based app using Python (Tkinter) for core banking operations.
- Implemented secure data handling for account and transaction management.
- Enhanced interface usability with form validation.

Bluetooth Chat Messenger

- Created Android app using Sketchware for offline chat via Bluetooth.
- Implemented real-time message exchange and pairing system.

Training & Certifications

- Data Science Proffesional - DUCAT.
- Data Analytics using Python – Shape My Skills.
- Generative AI Applications and Python Fundamentals – HCL GUVI.
- Decoding DevOps – From Basic to Advance Projects with AI – Udemy.
