PROFILE

As a dedicated Software Engineer, my primary goal is to design and develop high-volume, low-latency applications for mission-critical systems that guarantee high availability and exceptional performance under demanding conditions. I aim to consistently deliver clean, testable, and efficient code while actively contributing to every phase of the software development lifecycle, from architecture to production deployment.

EDUCATION

IMS GHAZIABAD, *Bachelor of Computer Applications* 09/2021 – 07/2024 | GHAZIABAD
65.86

IMS ENGINEERING COLLEGE, *Master of Computer Applications* 09/2024 – 06//2026 | GHAZIABAD
73.1

PROFESSIONAL EXPERIENCE

IBM (ACITE), *Frontend Web Development* 08/2025 – 09/2025 | Virtual

- Developed responsive and interactive web applications using HTML5, CSS3, and JavaScript, focusing on modern UI/UX principles, cross-browser compatibility, and mobile-first design under IBM-guided mentorship.
- Completed hands-on project-based learning, building a portfolio-ready individual frontend project that incorporated responsive layouts, code refactoring, debugging with developer tools, and best practices for user-friendly interfaces.
- Gained practical exposure to real-world frontend challenges through online workshops, live expert sessions, and mentor feedback, resulting in an official IBM SkillsBuild certificate and digital badge (endorsed by AICTE) to showcase industry-relevant skills.

SKILLS

Languages — java, python, javascript,c++ (for performance-critical code)

Frontend — HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript

Framework/Libraries — Next.Js, Remix, React.Js, Zustand, Shadcn UI

Backend — Node.js, Express.js, Stripe for Payments method

Databases & Storage — PostgreSQL, MySQL, NoSQL (MongoDB/Cassandra), SQL Optimization, Data Structures & Algorithms

Version Control — Git, GitHub

Soft Skill — Problem-Solving & Critical Thinking, Effective Communication, Team Collaboration & Adaptability

PROJECTS

1. E-Commerce Platform with Payment Gateway
Technologies: React.js, Node.js, MongoDB, Stripe, Tailwind CSS

Description: Built a full-stack e-commerce platform enabling users to browse products, manage carts, and make secure payments. Features include user authentication, product filtering, and an admin dashboard for inventory and order management.

2. Blogging Website
Technologies: React.js, Node.js, Mongodb, Express.js

Description: Developed and launched a personal blogging website to share articles and insights on various topics. The project involved creating a user-friendly interface, designing the site's layout, and ensuring a seamless experience for visitors. This project showcases skills in web development, content management, and user experience (UX) design.

CERTIFICATES

- Python Foundation Certificate
- Databases and SQL for Data Science with Python
