Tushar Sharma

Ghaziabad, Uttar Pradesh
e.tushar.2004@gmail.com — +91-9312154633 — github.com/Tushar6206 — linkedin.com/in/tushar-sharma-969b1b26b

Professional Summary

Final-year B.Tech CSE student with hands-on experience in software development, machine learning, and web technologies. Proficient in Python, JavaScript, React.js, Node.js, SQL, Flask, and Scikit-learn with strong understanding of REST APIs, frontend development, predictive modeling, and data analysis. Skilled in building scalable applications, Agile methodologies, problem-solving, and delivering data-driven software solutions through internships and real-world projects.

Education

IMS Engineering College, AKTU University **Aug 2022 – July 2026**
B.Tech in Computer Science and Engineering | SGPA: 8.0/10 *Ghaziabad, Uttar Pradesh*

Ch. Chhabil Dass Public School, C.B.S.E **2022**
Senior Secondary School (PCM) | 88% *Ghaziabad, Uttar Pradesh*

Ch. Chhabil Dass Public School, C.B.S.E **2020**
Secondary School | 90% *Ghaziabad, Uttar Pradesh*

Technical Skills

Languages: Python, C++, JavaScript, SQL
ML & AI: Scikit-learn, NumPy, Machine Learning, NLP, Predictive Modeling, Feature Engineering, Model Evaluation, Data Preprocessing
Data Analytics: Data Cleaning, EDA, Statistical Analysis, Data Visualization
Web, Tools & Platforms: React.js, Node.js, Flask, REST APIs, HTML, CSS, Git, GitHub, MATLAB, N8N, Replit, Vercel, Postman
Databases & Platforms: MySQL, MongoDB, Linux
Methodologies: Agile, SDLC, Problem Solving, Team Collaboration

Internship Experience

Patswap LLP **May 2025 – Aug 2025**
AI Agents & Content Creation Intern *Remote*

– Developed AI agents and automated workflows using LLMs, NLP tools, and prompt engineering techniques for content generation tasks.
– Integrated AI agents into scalable automation pipelines, improving workflow efficiency and reducing manual content processing effort.

Data Science Internship **Jan 2024 – Mar 2024**
Data Science Intern *Remote*

– Performed data wrangling, exploratory data analysis (EDA), and machine learning model development using Python and Scikit-learn.
– Worked with structured datasets for preprocessing, feature extraction, model training, and data visualization tasks.

Projects

Smart Load Forecasting System | *Streamlit, LightGBM, LSTM* | GitHub

– Developed a predictive analytics system for electricity demand forecasting using historical energy consumption datasets and deep learning techniques.
– Implemented LightGBM and LSTM models for time-series forecasting, improving prediction accuracy and supporting data-driven power management decisions.

Phishing URL Detection | *Python, Scikit-learn, Machine Learning* | GitHub **Mar 2025**

– Built a machine learning-based phishing detection system using URL-based feature engineering and classification algorithms.
– Achieved 90%+ accuracy using Random Forest and Logistic Regression with model evaluation and performance optimization techniques.

Fake News Detection | *Python, Flask, NLP, TF-IDF* | GitHub **Jan – Feb 2025**

– Developed an NLP-based fake news classification system using TF-IDF vectorization and Passive Aggressive Classifier for text analysis.
– Deployed the model using Flask framework with a responsive user interface for real-time news verification.

Price Comparison Website | *JavaScript, REST APIs, HTML, CSS* | GitHub **Dec 2024 – Jan 2025**

– Built a responsive web application that retrieves and compares product pricing data from multiple e-commerce APIs.
– Implemented dynamic filtering, sorting, and API integration functionalities to enhance user experience and product analysis.

Certifications

- Data Analytics Job Simulation – **Deloitte (Forage)** | Excel, Python, Power BI
- Introduction to Artificial Intelligence – **LinkedIn Learning** | Machine Learning Fundamentals
