SHIVAM SINGH

+91 8126310965 | shivampratap7417@gmail.com | linkedin.com/in/shivam-singh010 | github.com/shivamprt-07

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student specializing in Python, Django, and computer vision, with proven internship experience building an AI-powered real-time exam proctoring system. Passionate about backend and full-stack development, with additional exposure to ML pipelines, web scraping, and pose estimation systems.

EDUCATION

IMS Engineering College 2022-2026
B.Tech., Computer Science Engineering
Percentage: 74.8%

Bethesda Christian Academy 2019
Higher Secondary School Certificate (C.B.S.E.)

Saraswati Bal Mandir 2017
Secondary School Certificate (C.B.S.E.)

INTERNSHIP EXPERIENCE

Easehawk Technologies – Gurgaon, India
Web Development Intern *(June 2025 – August 2025)*

- Designed and developed an AI-powered Online Exam Proctoring System using Django, Python, MediaPipe/OpenCV, HTML, CSS, JavaScript, and PostgreSQL.
- Implemented **real-time face and eye tracking** to detect suspicious activities during online exams, with automated flag logging for review.
- Built exam modules with MCQ creation, timers, auto-submit functionality, and secure authentication.
- Optimized PostgreSQL database queries for faster performance and scalability.

PROJECTS

SMART-LOAD-FORECASTING-DASHBOARD:

GitHub: https://github.com/shivamprt-07/smart-load-forecasting-dashboard

Built an end-to-end electricity load forecasting system using LightGBM on historical load and weather data, covering the full ML pipeline: preprocessing, feature engineering, model training, and evaluation with an interactive Streamlit dashboard for real-time visualization and analysis.

Skills: Python · Streamlit · Pandas · Numpy · LightGBM

PRICE COMPARISON WEBSITE:

GitHub: https://github.com/shivamprt-07/price_comparison_website

Built a web scraping-based price comparison platform using Python, Selenium WebDriver, and Beautiful Soup to aggregate product prices from multiple e-commerce sites in real time. Developed a Flask backend to serve scraped data and a responsive frontend for side-by-side price analysis.

Skills: Python · Web Scraping · Front-End Development · Flask · Selenium WebDriver · Beautiful Soup

HUMAN MOTION ANALYSIS:

GitHub: https://github.com/shivamprt-07/human-motion-analysis

Built an AI-powered human motion analysis system using OpenCV and MediaPipe to perform real-time pose estimation. Tracked joint angles and body landmarks to provide form feedback for fitness exercises, with visualization using Matplotlib.

Skills: Python · OpenCV · Media Pipe · NumPy · Matplotlib

BUS RESERVATION SYSTEM:

GitHub: https://github.com/shivamprt-07/bus_reservation_system

Developed a full-stack Bus Reservation System using Node.js and vanilla JavaScript, featuring route browsing, seat selection, and ticket booking with a responsive UI built in HTML5 and CSS. Implemented RESTful server-side logic to handle reservation data and user sessions.

Skills: Node.js · HTML5 · Cascading Style Sheets (CSS) · JavaScript

Little Lemon Restaurant (Meta Certification Project):

GitHub: https://github.com/shivamprt-07/little-lemon-django

A full-stack Django web application for the fictional restaurant "Little Lemon." Features include menu display, booking system, user authentication, and an image carousel on the homepage. The project demonstrates backend logic with Django, responsive frontend design with Bootstrap 5, and database management with SQLite.

Skills: Django · Python · HTML · CSS · Bootstrap · SQLite · Git & GitHub

CERTIFICATIONS

- The Complete Python Bootcamp from Zero to Hero in Python – **Udemy, 2023**
- Django Web Framework – **Meta, 2025**
- Programming with JavaScript – **Meta, 2025**
- Machine Learning with Python – **IBM, 2026**

SKILLS

Programming Languages: Python, C, C++, JavaScript
Web Development: HTML, CSS, Bootstrap, Flask, Node.js
Databases: SQL, PostgreSQL
Technologies & Frameworks: Django, LightGBM, Streamlit
Operating Systems: Linux
Tools & Libraries: OpenCV, Media Pipe, NumPy, Matplotlib, Selenium WebDriver, Beautiful Soup

COURSEWORK

- Data Structures and Algorithms
- Object Oriented Programming
- Theory of Automata and Formal Languages
- Operating Systems
- Compiler design
