Muskan Garg

Data Analyst | Power BI | SQL | Excel

+91 9313812905 muskann11003@gmail.com github.com/muskannn113

PROFILE

Aspiring Data Analyst with a strong foundation in SQL, Excel, and data analysis. Experienced in working with real-world datasets through projects involving data processing, automation, and analytics. Skilled in transforming raw data into meaningful insights and building data-driven solutions. Currently developing expertise in Power BI, dashboarding, and business intelligence reporting.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering (AI & ML)

IMS Engineering College, Ghaziabad
Year : 2022-2026
Percentage (till 7th Sem) : 80.25%

EXPERIENCE

Automation Developer(Freelance Project)

Client: Local Fitness Business

- Built and deployed a WhatsApp automation system for a local fitness business to handle customer queries and trial bookings
- Developed automated lead follow-up and reminder scheduling using APScheduler to improve customer engagement.
- Implemented trial booking workflow, including user name capture, visit scheduling, and confirmation messaging.
- Created automated review request system to collect customer feedback after gym visits.
- Integrated media-based responses including transformation images and gym photos to improve lead conversion.
- Developed real-time owner notification system to alert business owners when high-intent leads interact with the chatbot.
- Collaborated in a 2-member engineering team to design and deploy a production WhatsApp automation system.

SKILLS

Programming:

Python, Java

Data Analysis & Visualization:

Data Cleaning & Transformation, Data Visualization & Reporting, Exploratory Data Analysis (EDA)

Tools and Technologies

SQL (Joins, Aggregations, Group By), MS Excel (Pivot Tables, XLOOKUP, Charts), Power BI (Dashboarding, DAX – basics), Python

Data Processing and Automation

Data Preprocessing, API-based Data Handling, Automation Workflows

Other Tools

Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

Clarity Band - Wearable Stress Detection System

Group Project | ESP32-S3 | Bio signal Sensors | Haptic Feedback

- Personalized user calibration with multi-sensor fusion for high-confidence stress detection
- Gentle haptic feedback to regulate the nervous system, experimentally validated for calming response
- Activity-aware detection to minimize false positives during exercise and movement
- **2nd Prize** — Synergy X: Project Expo, IMS Engineering College
- **Finalist** — Sprint4Good AI Hackathon, IIT Delhi (Reskill)
- **Finalist** — Innovate 3.0 Hackathon, JIIT, Noida (Unstop)

Vaayu Sentinel — AI-Enabled Air Quality Intelligence System

Group Project | Python | IoT | Computer Vision | Environmental Sensors | ML Classification

- Automated evidence capture during abnormal AQI spikes
- Analyzed environmental data to identify AQI trends and pollution sources
- Source identification with action recommendations and agency-aware evidence routing
- Micro-area hotspot insights showing daily AQI rise rates and dominant pollution causes
  Finalist — First Global AI Summit 2K26 – Hackathon, GLA University, Greater Noida

Sales Performance Dashboard

- Built interactive dashboard using Power BI to track revenue, profit, and trends
- Cleaned and transformed raw data using Power Query
- Created DAX measures for KPIs like total sales and profit %
- Implemented slicers and filters for dynamic data exploration

ACHIEVEMENTS

- **2nd Prize** — Synergy X: Project Expo 2026, IMS Engineering College
- **Finalist** — Sprint4Good Hackathon, IIT Delhi
- **Finalist** — Innovate 3.0 Hackathon, JIIT
- **Finalist** — First Global AI Summit Hackathon
