# PRIYANSHU TYAGI

Hapur, Uttar Pradesh
+91-7455805248 tyagipriyanshu7456@gmail.com

## EDUCATION

**AKTU UNIVERSITY**
*B.TECH - CSE -* ***Percentage: 82%*** *2022 – 2026*

**Dewan Public School** **Hapur, India**
*Intermediate -* ***Percentage: 89%*** *2021 – 2022*

## TECHNICAL SKILLS

**Languages:** Python, Java, Js, SQL
**Framework and Tools:** Spring Boot, React, FastAPI, Flask
**Core Concepts:** Data Structures Algorithms, OOP, Machine Learning, Artificial Intelligence
**Libraries/Technologies:** OpenCV, Scikit-learn, NumPy, Pandas
**Developer Tools:** VS Code, Jupyter Notebook, Google Colab, Git

## PROJECTS

**AI-Based Recruitment Automation System(SpringBoot, FastAPI, NLP)** **2026**
- Designed and developed an end-to-end AI-driven recruitment pipeline to automate candidate screening and evaluation.
- Implemented resume parsing using NLP techniques to extract structured candidate data.
- Built semantic matching using transformer-based embeddings to rank candidates against job descriptions.
- Integrated machine learning models for candidate scoring and shortlisting.
- Designed modular APIs for interview scheduling and automated evaluation workflows.
- Technologies: Python, FastAPI, NLP (SpaCy), Sentence Transformers, Scikit-learn

**Url Shortener App(SpringBoot, Maven, React)** **2025**
- Developed a secure and scalable URL shortening service with user authentication.
- Implemented REST APIs for URL generation and redirection.
- Integrated JWT-based authentication for secure access control.

**Driver Drowsiness(Python, OpenCV, Machine Learning)** **2023**
- Developed a real-time computer vision system to detect driver fatigue.
- Used facial landmark detection to monitor eye closure patterns.
- Triggered alert mechanisms when drowsiness thresholds were exceeded.
- Improved driver safety through automated monitoring.

## TRAINING

**Summer Internship(Brain Mentors pvt. ltd.)** **2025**
- Gained hands-on experience in Java and backend development using Spring Boot.
- Built REST APIs and understood application architecture and deployment workflows.

**Data Science using Python** **2023**
- Performed data analysis, visualization, and preprocessing using Python libraries.
- Extracted actionable insights from structured datasets.

**AI and ML Development** **2023**
- Built predictive models and implemented machine learning algorithms.
- Worked on computer vision tasks including face detection using OpenCV.

## CERTIFICATIONS

- Python for Data Science [QAcademy]
- AI-ML Development [SolveForge]
- ChatGPT for Everyone [GUVI]
- Summer Internship Training [Brain Mentors]
