Pranshul Sharma Data Scientist

pranshulsharma83@gmail.com | +91 9650767849 | New Delhi, India | LinkedIn | Github

Professional Summary

Aspiring Data Scientist with hands-on experience in Python, SQL, and machine learning, focused on building end-to-end pipelines from data ingestion to model deployment. Skilled in exploratory data analysis, statistical modeling, and predictive analytics. Seeking an Associate Data Scientist role to apply applied ML skills and deliver data-driven solutions at scale.

Professional Experience

Software Engineer Intern, *NuSummit Cyber Security Limited* 09/2025 – 05/2026

- Automated 50+ compliance validation checks using Python and XML, reducing manual verification time by **85%**.
- Developed custom validation logic using APIs and CLI automation, improving detection accuracy across 500+ servers.

Generative AI Virtual Intern, *IBM SkillsBuild* 05/2024 – 07/2024

- Worked on data-centric AI projects with emphasis on data preparation, quality assessment, and result interpretation.
- Implemented responsible AI practices focusing on data validation and ethical deployment strategies.

Education

Bachelor of Technology (B.Tech) – Information Technology, *IMS Engineering College, Ghaziabad* 05/2026
GPA: 8.6 / 10

Technical Skills

Core Analytics
Excel, SQL (PostgreSQL, T-SQL), Python (Pandas, NumPy), EDA, Statistical Analysis, Data Cleaning

Advanced ML
PyTorch, Computer Vision, NLP (HuggingFace)

Visualization & BI
Power BI, Tableau, Matplotlib, Seaborn, Dashboard Design

Tools & Deployment
Git, Docker, FastAPI, Streamlit, Gradio

Data Engineering
ETL Pipelines, Data Warehousing (Bronze–Silver–Gold), Data Modeling

Machine Learning
Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Scikit-learn

Certifications & Achievements

BCG Data Science Job Simulation on Forage - February 2026

Data Analysis & SQL
DataCamp (90+ certificates in Data Science & Analytics)

Tata's Data Visualisation Job Simulation on Forage

IIC Hackathon Finalist
6th place out of 764 teams, Manipal University Jaipur (2024)

Machine Learning Specialization
Stanford University (Coursera)

Deep Learning with PyTorch
Zero to Mastery (Udemy)

Projects

RAG Research Assistant — AI-Powered Document Q&A System

- Built end-to-end RAG pipeline (LangChain + Gemini 2.5 Flash + ChromaDB) enabling natural language Q&A over PDFs with page-cited
- Designed async REST API with FastAPI & Pydantic v2; implemented idempotent re-indexing to skip duplicate document uploads.
- IContainerized with Docker Compose and shipped CI/CD via GitHub Actions with an 8-test pytest suite using fully mocked dependencies

Enterprise Data Warehouse Project (SQL Server)

- Designed an end-to-end analytical data warehouse with Bronze, Silver, and Gold layers for scalable analytics.
- Implemented BULK INSERT ingestion and incremental loading strategies for 1M+ transactional records.
- Modeled fact and dimension tables supporting KPI reporting and time-series trend analysis.

PyTorch FoodVision: End-to-End ML Deployment

- Architected an end-to-end computer vision pipeline using transfer learning (EfficientNetB2, ViT) for 101-class food classification.
- Deployed interactive web applications via Gradio and Hugging Face Spaces, demonstrating the full MLOps lifecycle.
- Managed the project lifecycle from data acquisition and model training to deployment and real-time inference.

Customer Churn Prediction & Analysis | Python

- Performed comprehensive churn analysis using Python (Pandas, NumPy, Matplotlib, Seaborn).
- Built predictive models achieving **91.5%** accuracy using ensemble methods (XGBoost + LightGBM).
- Identified key churn drivers and translated findings into actionable retention strategies.
