PROFESSIONAL SUMMARY

Computer Science and Engineering student specializing in Full-Stack development, with hands-on experience building Internet of Things projects and hardware prototypes. Passionate about creating technology that solves real-world problems, demonstrated by projects ranging from hardware projects to data-driven web platforms. Combines strong technical skills in software and embedded programming with proven team leadership and communication abilities.

EDUCATION

B. Tech Technology in Computer Science and Engineering (Internetof Things) **2022-26**
Noida Institute of Engineering and Technology Greater Noida
75.4%

Higher Secondary School **2020-21**
St. Thomas' School New Delhi
94%

Secondary School **2018-19**
St. Thomas' School New Delhi
94.6%

PROJECTS

Accident Detection System | IoT Github

- This is a hardware project based on IoT technology which uses Arduino Nano, GSM 900 module, NEO 6M-GPS module and the MPU6050 sensor
- This Project can help in road safety initiatives by enabling the first responders to reach the affected people quickly.

Fact Checker | MERN Github

- This is a full Stack Web Application project which uses technologies like HTML, CSS, JavaScript, React, Supabase, and is deployed on Vercel.
- The application can be used to perform Create, Read, Update and Delete functions, the user can do these operations to manipulate data on new facts.

TECHNICAL SKILLS

Languages | Java, React, HTML, CSS, Javascript, SQL, Embedded Programming
Frameworks | React, Django, Spring Boot, Flask, Angular, Ruby on Rails, Express.js
Developer Tools | Git, Docker, Visual Studio Code, Eclipse IDE

LEADERSHIP AND ACTIVITIES

Student Clubs

- Head Coordinator (College Editorial Club)
  Elected the Head Coordinator of the College Coordinator Club "Sangrachna".
  Organised Multiple events in the college.
  Anchored in multiple college events

- Coordinator (College Theatre Club)
  Elected the Coordinator of the College Theatre Club "Kathputliya".
  Acted in several plays, also as a lead role.
