Education

Noida Institute of Engineering2022 – 2026
B.Tech in Computer Science & Engineering | 7.0 CGPA

Silver Line Prestige School
Class 12: 78.8% (2022) | Class 10: 80% (2020)

About

Dynamic and proactive Computer Science student eager to apply programming, algorithms, and system design skills to an internship role. Strong passion for software development, data analysis, and emerging technologies like AI and cloud. Skilled in building efficient solutions and solving complex technical problems. Motivated to collaborate with diverse teams and contribute to impactful projects.

Projects

CLYX – Influencer-Brand Collaboration Platform: A platform that uses machine learning with Graph Neural Networks for influencer-brand matching. Supports real-time collaboration, provides data insights, and allows content integration. Built using Flutter, Flask, and MongoDB.

Online Banking System – Core Java, Collections, File I/O, JDBC: Developed a console-based banking application with account creation, deposit, withdrawal, fund transfer, and balance inquiry. Implemented OOP principles and integrated File Handling/JDBC for persistent data and transaction history.

Smart Bottle: Integration of multiple sensors (TDS, pH, Weight, Bluetooth, GPS) with an Arduino microcontroller to analyze water quality and inform the user whether water is safe for drinking.

Technical Skills

Languages: Java, C++, Python, HTML, CSS, JavaScript, PHP

Technologies/Frameworks: Node.js, Flask, Express.js, Django, Bottleneck

Clouds & Databases: MySQL, PL/SQL, MongoDB

Developer Tools: VS Code, GitHub

Work Experience

Internship – Ethara.AI **Jan 2026 – Mar 2026**

- Contributed to real-world AI projects focused on post-training and evaluation of Large Language Models (LLMs).
- Participated in AI workflow processes including data preprocessing, content analysis, and model output assessment.
- Worked in a remote gig-based environment, developing professional communication and time management skills.

Internship – Honda Cars **July 2025 – Aug 2025**

- Assisted in developing backend modules using Java and Spring Boot, contributing to small features and bug fixes under mentorship.
- Gained hands-on experience with RESTful APIs, understanding request/response lifecycles and HTTP methods.
- Wrote basic SQL queries and helped with data validation tasks on MySQL/PostgreSQL databases.

Participation & Achievements

- 5 Star @HackerRank and 1 Star @CodeChef
- Consistently solving Data Structures and Algorithms problems on LeetCode.

Certifications

- Java Developer Professional Certificate – IBM via Coursera
- Microsoft Certified Azure Fundamentals
- Python for Data Science, AI & Development – IBM via Coursera
