# Shuchita Prakash

Full-Stack Java Developer | B.Tech Computer Science 2026
Ghaziabad, India • +91-8318569392 • shuchitaprakash555@gmail.com • LinkedIn • GitHub

## SUMMARY

Final-year B.Tech Computer Science student with strong skills in Java full-stack development, including Spring Boot, REST APIs, and modern frontend technologies; experienced in building scalable applications and AI-driven solutions like safety and blockchain-based systems; focused on delivering efficient, real-world software with strong problem-solving and system design abilities.

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages:** | Java, Python, JavaScript, TypeScript, Solidity, C |
| **Frameworks/Tools:** | Spring Boot, React.js, Flutter, Node.js, Firebase, REST APIs, Git, GitHub |
| **Databases:** | MongoDB, Firebase Realtime DB, SQL |
| **Concepts:** | Data Structures & Algorithms, OOP, DBMS, Operating Systems, Agile, SDLC |
| **Blockchain:** | Ethereum, Polygon, Hardhat, Solidity, IPFS, Smart Contracts |

## INTERNSHIP EXPERIENCE

**Amdox Technology** — Java Full-Stack Developer Intern *Apr 2026 – Present*

- Engineered 2 full-stack modules in Java and Spring Boot, cutting backend response time by 20%; coordinated daily stand-ups with an 8-member Agile team to align on sprint deliverables.
- Configured 5 RESTful API endpoints linking React.js frontend to backend services; documented all API contracts and communicated integration requirements across 2 cross-functional teams.

**Cetpa Infotech** — Web Development Intern *Apr 2024 – Jun 2024*

- Delivered 4 reusable React.js UI components used across 6 screens, reducing per-screen development time by 35%; presented component library to senior developers for code review.
- Accelerated page load speed by 30% using lazy loading and code-splitting across 3 high-traffic routes; shared performance findings in weekly team meetings.

## PROJECTS

**Blockchain-Based Blue Carbon Registry** | GitHub *Aug 2025 – Nov 2025*

- Led blockchain architecture decisions for 5 Solidity smart contracts handling carbon credit tokenization on Ethereum/Polygon; enforced RBAC across 3 user roles via Hardhat pipeline.
- Reduced document retrieval time by 40% via IPFS decentralized storage; presented system architecture to a 4-member review panel and incorporated feedback across 2 iteration cycles.

**SafeComm – AI Safety Application** | GitHub *Jan 2026 – Present*

- Spearheaded an NLP pipeline classifying distress across 2 input channels (voice + text), achieving 85%+ accuracy on 1,000+ labeled samples; wrote technical documentation for all model APIs.
- Automated GPS emergency alerts to 3+ contacts within 5 seconds of distress detection; collaborated with 2 teammates to integrate Firebase push notifications and live location APIs.

**Equal Footsteps – Navigation App** | GitHub *Nov 2025 – Jan 2026*

- Launched Flutter navigation app with real-time GPS tracking; mapped 10+ transport hubs via Google Maps API, improving route accuracy by 25% across test scenarios.
- Processed live location data through Firebase Realtime DB, achieving under 2-second sync latency; guided 2 junior contributors through Firebase integration and onboarding.

## EDUCATION

**IMSEC, Ghaziabad** — B.Tech, Computer Science & Engineering *Aug 2022 – Jun 2026 | CGPA: 7.3/10*

**S.V.M. School, Aligarh** — Class XII (PCM) *Apr 2020 – Apr 2021 | 93.8%*

## ACHIEVEMENTS & CERTIFICATIONS

- DSA Training – Skillrisers (Jul 2025 – Sep 2025): Completed 3-month program on 15+ data structure topics, algorithm design, and complexity analysis; cleared 3 mock technical interviews.
- Application Development Certification – Krutanic (Jan 2026): Completed 40+ hours of hands-on app development training.
- Ethical Hacking Webinar – IIT Delhi (Mar 2025): Attended 8-hour cybersecurity workshop on network vulnerabilities and ethical hacking fundamentals.
