SUMMARY

A goal-oriented and adaptable Programming Enthusiast with strong problem-solving and communication skills, seeking to leverage expertise in programming concepts to contribute to innovative software solutions. Committed to collaborative development practices and passionate about building efficient applications.

EDUCATION

Noida Institute of Engineering and Technology Oct '22 — Present
B. Tech in Computer Science (AIML)

Modern School, Noida 2022
Senior Secondary School

EXPERIENCE

GEN-AI Powered Data Analytics Job Simulation — Internship Mar '25 — Apr '25
Tata Virtual

- Performed exploratory data analysis (EDA) and built AI-based models for risk profiling and delinquency prediction.
- Created business reports and data storytelling presentations, proposing an AI-driven collections strategy for improved decision-making.

Ethara AI — LLM Model Trainee Intern Jan '26 — Feb '26
Gurgaon On-site

- Worked as an LLM Model Trainee, performing tasking and data operations on the Odoo platform to support AI model workflows.
- Contributed to image recognition projects on Multi Mango, including data annotation and model-related tasks.
- Assisted in training and improving AI/ML models by handling datasets, validating outputs, and ensuring task accuracy.

PROJECTS

AI Powered Employee Information Retrieval Chatbot Apr '25 — May '25

- Built a Retrieval-Augmented Generation (RAG) chatbot to automate employee information queries.
- Integrated MySQL database for structured employee data storage.
- Implemented Hugging Face transformer models for contextual answers.
- Reduced manual response time by ~70% in test cases.

NAS Server Oct '22 — Present

- Deployed a NAS server using OpenMediaVault on a dedicated Linux machine, enabling secure centralized file storage and sharing across local devices.
- Configured SMB/NFS protocols, user authentication, and access permissions to control shared folder visibility and protect sensitive data.
- Implemented scheduled backups and integrated remote access for file synchronization, enhancing data availability and resilience.
- Gained practical experience in network administration, filesystem management, and Linux-based server hardening through hands-on deployment.

SKILLS

Programming Languages - Python, C/C++, SQL, DBMS, Java, HTML, CSS, JavaScript
Artificial Intelligence & Machine Learning - Supervised and Unsupervised Learning, Computer Vision, NLP, YOLO
Tools - Git & GitHub, Postman, VS Code, Matplotlib, Google Cloud, Hugging Face / Kaggle, Tableau, Power BI, Docker
Soft Skills - Teamwork, Continuous Learning, Problem Solving, Time Management

CERTIFICATIONS

- Coursera — Python Basics
- Infosys Springboard — Cyber Security and Applied Ethical Hacking
- HackerRank — SQL (Basic), Python (Basic)
- Deep Learning with Developers
- Generative AI, Google Cloud

CO-CURRICULAR ACTIVITIES

- Participated in Smart India Hackathon (SIH) 2024, a nationwide initiative to provide students with a platform to solve real-world problems and innovate using technology.
- Active Participant in Zonals (AKTU Sports Fest).
