Shuchita Prakash

Full-Stack Java Developer | B.Tech Computer Science 2026
Ghaziabad, India • +91-8318569392 • shuchitaprakash555@gmail.com • LinkedIn • GitHub

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript, Solidity, Dart, C
Frameworks/Tools:	Spring Boot, React.js, Flutter, Node.js, Web3.js, Firebase, REST APIs, Git, GitHub
Databases:	MongoDB, Firebase Realtime DB, SQL
Concepts:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Agile, SDLC
Blockchain:	Ethereum, Polygon, Hardhat, Solidity, IPFS, Smart Contracts

INTERNSHIP EXPERIENCE

Amdox Technology — Java Full-Stack Developer Intern*Apr 2026 – Present*

- Helped improve backend speed (response time by 20%) for 2 key Java/Spring Boot sections by assisting the development team with testing and minor code tweaks. Actively learned and participated in an 8-member Agile team, attending daily stand-ups and tracking task progress.
- Built and connected 5 new RESTful API endpoints to link the React.js app with backend services. I learned to follow API contract standards and supported the team with integrating new features across departments.

Cetpa Infotech — Web Development Intern*Apr 2024 – Jun 2024*

- Delivered 4 reusable React.js UI components used across 6 screens, reducing per-screen development time by 35%; presented component library to senior developers for code review.
- Accelerated page load speed by 30% using lazy loading and code-splitting across 3 high-traffic routes; shared performance findings in weekly team meetings.

PROJECTS

SafeComm – AI Safety Application | GitHub *Jan 2026 – Present*

- Developed an NLP pipeline to classify distress signals from voice and text inputs, achieving 85%+ accuracy on a dataset of over 1,000 labeled samples; documented all model APIs.
- Built an emergency feature that automatically sends GPS alerts to 3+ contacts within 5 seconds of distress; worked with 2 teammates to implement Firebase push notifications and live location APIs.

Equal Footsteps – Navigation App | GitHub *Nov 2025 – Jan 2026*

- Developed a Flutter navigation application with real-time GPS tracking; utilized the Google Maps API to map 10+ transport hubs, improving route accuracy by 25% across test scenarios.
- Managed live location data using Firebase Realtime DB to ensure under 2-second synchronization; assisted 2 newer team members with Firebase integration and setup.

Blockchain-Based Blue Carbon Registry | GitHub *Aug 2025 – Nov 2025*

- Designed and implemented the blockchain architecture for the project, including 5 Solidity smart contracts for carbon credit tokenization on Ethereum/Polygon; used Hardhat to enforce role-based access (RBAC) for 3 user types.
- Integrated IPFS decentralized storage to optimize document access time; presented the system design to a review panel and updated the architecture based on feedback.

EDUCATION

IMSEC, Ghaziabad — B.Tech, Computer Science & Engineering *Aug 2022 – Jun 2026 | CGPA: 7.3/10*

S.V.M. School, Aligarh — Class XII (PCM) *Apr 2020 – Apr 2021 | 93.8%*

ACHIEVEMENTS & CERTIFICATIONS

- DSA Training – Skillrisers (Jul 2025 – Sep 2025): Completed 3-month program on 15+ data structure topics, algorithm design, and complexity analysis; cleared 3 mock technical interviews.
- Application Development Certification – Krutanic (Jan 2026): Completed 40+ hours of hands-on app development training.
- Ethical Hacking Webinar – IIT Delhi (Mar 2025): Attended 8-hour cybersecurity workshop on network vulnerabilities and ethical hacking fundamentals.
- Solved 50+ DSA problems on LeetCode; targeting 200+ by Aug 2026 through daily structured practice.
