RAHUL YADAV

Ahighly enthusiasticand self motivating developer aspiring to solve real-world problems using technology, Currently I am a Final Year (CSE-AIML) Engineering student and I have been exploring different fields including Big Data, Machine Learning,Deep Learning & Data Science.Passionate towards my work and enjoy exploring and eager to learn about new tools & technologies, always hungry for learning and improving as a person.

EDUCATION

Bachelor of Technology(CSE-AIML)

J.S.S Academy of Technical Education

2023 - 2026, *Current SGPA - 4.71*

DIPLOMA

GOVERNMENT POLYTECHNIC BASTI

2020 - 2023 *Percentage - 70.25*

HSC

M P D IC SHANKARPUR KEWALGANJ AZAMGARH

2016 - 2018 *Percentage - 53.8*

SSC

RAMLAKHAN S I C HARAIRAMPUR AZAMGARH

2015 - 2016, *Percentage - 83.33*

PROJECTS

PROJECT1:HADOOP SEMISTRUCTURED DATA PROCESSING USING AVRO FILE FORMAT

- **This project describes how to Transfer data from RDBMS to HIVE in a incremental manner using Sqoop jobs. The Data will be stored in Avro file format .**
- **Responsibilities:**
- Performed importing of data files from RDBMS server to appropriate HDFS directories based on file names.
- Processing of data from the files in the HDFS directories and loading the data to appropriate Hive Staging table
- Automated the incremental data append to HIVE tables and schema evolution process using unix shell scripts.
- **Technologies: Hadoop3.0, HDFS, Sqoop, Hive, Avro**

PROJECT 2 : SPARK-HIVE- Complex JSON Data PROCESSING

- **Receiving data from 2 source (WebAPI and HDFS) loading into Spark environment and created Dataframes of the complex json data to analyse the data through multiple stagging area.Done Stiching of data from the HDFS to the web API for better predictive analytics.**
- **Responsibilities:**
- Involved in creating HDFS directories to store the data and Hive table.
- Creating Scala code to read the data from the web apI and HDFS and to a create a dataframe.
- Performing actions which include cleansing and transformation of data.
- Pushing the crunched data to Hive table.
- **Technologies: Hadoop3.0,HDFS, HIVE,SPARK**

TECHNICAL SKILLS

SQL HDFS HQL Python(Basic) HADOOP SQOOP HIVE SPARK DATABASES - MySql OPERATING SYSTEMS - Linux, Windows CLOUD - AWS S3 , AWS EC2 , AWS EMR PLATFORMS WORKED ON - BIG DATA HADOOP , SPARK

SOFT SKILLS

Quick learner

Teamwork

Adaptability

Time Management

CERTIFICATES

Acourse in BigData analytics Completed (November 2025-.....) in Zeyobron Analytics

INTERESTS

Big Data Analytics Data Engineering Data Science Machine Learning
