Summary

I am a Software Development Engineer with a solid foundation in programming languages such as C++, Java, Python, and JavaScript. Having gained practical experience in building scalable web applications using React and Node.js. I also have a deep interest in Generative AI focusing on RAG Systems using vectordatabases . I focus on optimizing performance and implementing robust solutions. My passion lies in contributing to impactful software projects within growth-oriented environments

Skills

C/C++ · Python · JavaScript · React · Node.js · Generative Ai · RAG Syatems · Vector databases · Git · Your Skill · AWS · Express.js · HTML · SQL · MongoDB · PostgreSQL · GitHub · Docker · Postman · EC2 · S3 · C++ Programming · OOPS · Data structures And Algorithms

Experience

TechNovation Solutions (Remote) — Remote
Software Development Intern — 04/2025 - 06/2025

Software Development Intern

- Developed and deployed a full-stack web application enabling real-time task tracking, improving project visibility by 35%
- Designed and integrated RESTful APIs to handle authentication, task management, and data persistence
- Implemented responsive user interfaces in React.js with reusable components, improving frontend load time by 25%
- Collaborated with a cross-functional team of 5 developers using Agile methodology and version control through Git and GitHub

Projects

Smart Queue Management System

Smart Queue Management System

- Developed a web-based queue management platform to handle online token booking, reducing customer waiting time by 60%
- Built RESTful APIs in Node.js and Express.js for booking, queue updates, and user authentication
- Designed a real-time dashboard for users and admins using React.js with dynamic API integration
- Utilized MongoDB for efficient data storage and retrieval, ensuring seamless handling of concurrent users
- Deployed the system on AWS for scalability and reliability, enabling 24/7 uptime during testing phase

Conversational Chatbot Assistant

Conversational Chatbot Assistant

- Built an AI-powered chatbot capable of answering user queries(RAG based)and assisting with appointment booking through a web interface
- Generative AI with vector databases, vector embedding, trained on company's data.
- Deployed backend services using handling and response delivery
- Implemented logging and analytics to track user interactions and improve chatbot accuracy by 20%
- Integrated chatbot with the Smart Queue website to enhance user support and accessibility

Education

Delhi Public School,Moradabad — Percentage: 94%
Class 10 — 2019

Saraswati Vidya Mandir,Sambhal — Percentage: 84%
Class 12 — 2021

JSS Academy of Technical Education,Noida — Cgpa: 8.1
B.Tech — 2026

Certifications

C++ Programming Masterclass – Udemy — Completed 60+ hours of coursework covering OOP, multithreading, and data structures

Top 5% in HackerRank Coding Challenge — Ranked among the top 200 of 4,000+ global participants for algorithmic problem-solving

Key Achievements

Best Final Year Project – JSS College
Developed Smart Queue Management System, a full-stack website for real-time online queue booking and admin monitoring
